The *Oxford Handbook of International Law in Asia and the Pacific* brings together pre-eminent and emerging specialists to analyse the approach to and influence of key states of the region, as well as whether truly 'Asian' trends can be identified and what this might mean for international order.

The growing economic and political significance of Asia has exposed a tension in the modern international order. Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to the international agreements or to be represented in international organizations.

That is changing.

- The first comprehensive survey of international law to consider most Asian national jurisdictions
- Provides a thematic roadmap of international law in the Asia and Pacific regions
- Reviews key contributions of individual Asian states to the development of international law
- Affords a detailed consideration of key jurisdictions by regional experts

September 2019 (UK) | October 2019 (US)
