

CENTRE FOR INTERNATIONAL LAW
National University of Singapore

RESEARCH POSITION IN CLIMATE CHANGE LAW AND POLICY PROGRAMME

CIL is accepting applications for a Research Associate to join our Climate Change Law and Policy Programme, with the following main duties:

- Conduct in-depth research in topics of climate change law and policy particularly focusing on Southeast Asia both self-directed and as assigned.
- Organise and execute, in coordination with the team and the administrative staff, CIL's climate change law and policy events, and prepare post-event reports.
- Develop and expand the research and network components of CIL's webpage on climate change law and policy.
- Perform other related functions as may be assigned by the Associate Director or CIL Director.

Interested applicants must possess a minimum qualification of an LLB/JD, including coursework or dissertation work in international law. An LLM in public international law or international environmental law will be highly desirable. Candidates must possess good knowledge of the legal framework of climate change; highly developed research and writing skills; strong organisational and communications skills. A keen interest in ASEAN environmental laws and climate change policies is advantageous.

For further information about CIL, please visit the website at <https://cil.nus.edu.sg/>.

Interested candidates should send the following to Miss Yvonne Lee at cil.jobs@nus.edu.sg by **29 November 2019**:

- CV
- Letter of interest
- Two writing samples
- The names/contact information of two referees

CIL provides a lively and congenial work environment and the opportunity to engage with in-house and visiting international law experts. The successful candidate will be expected to participate in Centre events and activities, as well as to pursue his/her own research project with a view to publication.
