## THE RCEP, NEW ASIAN REGIONALISM AND THE GLOBAL SOUTH

Pasha L. Hsieh\*

**Abstract:** This article provides an up-to-date examination of the Regional Comprehensive Economic Partnership (RCEP), which is poised to become the world's largest free trade agreement (FTA). It argues that the 16-country mega-FTA will galvanize the paradigm shift in Asian regionalism and build a normative foundation for the Global South in international economic law. Based on intertwined theoretical and substantive claims, this article opens an inquiry into the assertive legalism of developing nations in the new regional economic order.

By analyzing the converging policies of the Association of Southeast Asian Nations (ASEAN), China and India, the article first demonstrates the status of the RCEP in Asian powers' contemporary FTA practice. In light of the ASEAN Economic Community and the now-eleven member Trans-Pacific Partnership, caution should be given to the utilization of tariff preferences, services liberalization and investor-state dispute settlement. Finally, the article assesses the RCEP's systemic impact on the legal fragmentation due to jurisdictional conflicts under trade and investment agreements. The consolidation of divergent trade rules and the pro-development operative mechanism will fortify the RCEP as a pathway to the Free Trade Area of the Asia-Pacific and reinvigorate the multilateral trading system.

## I. Introduction

International economic law and the Global South are at a crossroads in the era of populist isolationism.<sup>1</sup> The resurgence of Westphalian sovereignty in economic policy has endangered the neoliberal basis of free trade that has underpinned the world's development since the inception of the postwar Bretton Woods system.<sup>2</sup> Evolving mega-regionals were once perceived to remedy the long-standing impasse of the Doha Round of the World Trade Organization (WTO). Nevertheless, the globalization backlash, evidenced by Brexit and the Trump administration's withdrawal from the Trans-Pacific Partnership (TPP), has invigorated developing countries to pursue a new normative foundation for economic integration.<sup>3</sup>

Trade nationalism across the Atlantic has not deterred the dynamic development of Asian regionalism, which is witnessing a nearly four-fold growth of free trade agreements (FTAs) that represent half of global trade pacts.<sup>4</sup> A salient feature of the Asian FTAs is the transformation of conventional South-South geopolitical cooperation into new-generation economic instruments. As the most ambitious mega-regional agreement led by the Global South, the Regional Comprehensive Economic Partnership (RCEP) is poised to be the world's largest FTA in 2018.<sup>5</sup>

<sup>2</sup> For the nexus between sovereignty and emerging trade protectionism, see Wallace S. Cheng, *To Open up Global Trade We Need to Understand "Protectionism,"* June 13, 2017, <https://www.weforum.org/agenda/2017/06/global-trade-protectionism-g20-explained/>; Douglas A. Irwin, *The False Promise of Protectionism: Why Trump's Trade Policy Could Backfire*, 96:3 FOREIGN AFF. 45, 45-53 (2017).

<sup>3</sup> The impact of Brexit and the US withdrawal from the Trans-Pacific Partnership (TPP) on Asian states, see Hoang Thi Ha et. al., *ASEAN's Reflections from Brexit*, 9 ASEAN FOCUS 19, 20-21 (2016); Marina Tsirbas et. al., *The Future of the TPP*, 11 ASEAN FOCUS 8, 10-15 (2016).

<sup>4</sup> The number of Asian free trade agreements (FTAs) in effect increased from 39 to 147 from 2000 to 2017. Table 1. FTAs by Status (cumulative), <https://aric.adb.org/fta> (last visited June 28, 2017); see also Regional Trade Agreements, [https://www.wto.org/english/Tratop\\_e/region\\_e/region\\_e.htm](https://www.wto.org/english/Tratop_e/region_e/region_e.htm) (last visited June 28, 2017) ("As of 5 May 2017, 274 RTAs were in force.").

<sup>5</sup> Joint Leaders' Statement on the Negotiations for the Regional Comprehensive Economic Partnership (RCEP) (2017), at 1; Giovanni Di Lieto, *Understanding RCEP in Xi Jinping's World Trade Game*, ASIA TIMES, Sept. 27, 2017., <http://www.atimes.com/understanding-rcep-xi-jinpings-world-trade-game/>; Rebecca Fatima Sta Maria, *RCEP More Relevant Now Than Ever*, STRAITS TIMES, Jan. 18, 2017, <http://www.straitstimes.com/opinion/rcep-more-relevant-now-than-ever>.

Built upon the Association of Southeast Asian Nations (ASEAN) FTAs, the 16 RCEP countries account for 32% of world goods exports and 28% of global gross domestic product (GDP).<sup>6</sup> Incorporating the world's ten most vigorous economies, including ASEAN states, China and India, contributes to the bloc's GDP growth rate of 4.6%, which is more than double that of the United States or the European Union.<sup>7</sup> More fundamentally, the RCEP agenda will converge fragmented trade rules and the economic priorities of Asia's powerhouses, such as the ASEAN centrality, Beijing's "One Belt One Road" (OBOR) initiative and New Delhi's Act East Policy.<sup>8</sup>

Double the economic scale of the "reborn" TPP, the 11-party Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), the RCEP will be the most critical milestone since the Asia-Pacific Economic Cooperation (APEC) was established in 1989.<sup>9</sup> To a large extent, premature aspirations for the TPP have overshadowed academic and policy discourse on the RCEP. To fill a gap in legal literature, this article offers a timely and "on the ground" response to the systemic implications of the RCEP for international economic law. By making interrelated theoretical and substantive claims, the article opens an inquiry into the assertive legalism of developing countries in the new regional economic order (NREO) based on new-generation South-South FTAs.<sup>10</sup>

---

<sup>6</sup> External free trade agreements (FTAs) of the Association of Southeast Asian Nations (ASEAN) were concluded between ten ASEAN states collectively with China, Japan, Korea, Australia, New Zealand, India and Hong Kong. <sup>8</sup> See Zhao Hong, China One Belt One Road: An Overview of the Debate, 6 Trends in Southeast Asia 1, 1-30 (investigating current economic policies of ASEAN, China and India).

<sup>9</sup> Trans-Pacific Partnership Ministerial Statement (2017) [TPP Statement], at 1; see Minister Champagne Welcomes Progress on the Comprehensive and Progressive Trans-Pacific Partnership, Nov. 10, 2017, [https://www.canada.ca/en/global-affairs/news/2017/11/minister\\_champagnewelcomesprogressonthecomprehensiveandprogress.html](https://www.canada.ca/en/global-affairs/news/2017/11/minister_champagnewelcomesprogressonthecomprehensiveandprogress.html) ("The members of the CPTPP represent 494 million people, with . . . 13.6% of global GDP"); APEC Outcomes & Outlook (2016-2017) [APEC 2016-17], at 48-51 (explaining the milestones of the Asia-Pacific Economic Cooperation (APEC) since 1989).

<sup>10</sup> Although the term, new regional economic order (NREO), was previously used by commentators, none of them have substantiated the theoretical or substantive claims related to mega-regionals and Asian regionalism. E.g., Adriano R. Garcia, *Toward a New Regional Economic Order in Asian and the Pacific*, X:1-b J. PHIL. DEV. 45, 45-53 (1983); Greg Fry, "Pooled Regional Governance" in *The Island Pacific: Lessons from History*, in PACIFIC ISLANDS REGIONAL INTEGRATION AND GOVERNANCE 89, 92 (Satish Chand ed. 2005); KUNIKO ASHIZAWA, JAPAN, THE US, AND REGIONAL INSTITUTION-BUILDING IN THE NEW ASIA: WHEN IDENTITY MATTERS 66 (2013). I will make a further distinction between the NREO and the new international economic order (NIEO) in the 1970s in subsequent sections.

This article argues that the emerging RCEP represents the NREO, which will prompt paradigm shifts in Asian regionalism and construct a normative foundation for the Global South in international economic law. It further contends that revolutionizing the RCEP as Asia's economic framework mandates commitments beyond ASEAN+1 FTAs and the new ASEAN Economic Community (AEC). The roadmap, which takes into account of the nexus between the AEC Blueprint 2025 and Asia-Pacific trade pacts, will necessitate the realization of the Free Trade Area of the Asia-Pacific (FTAAP) and reenergize the Doha round talks.<sup>11</sup>

The article proceeds as follows. Part II provides the geopolitical context of Asian regionalism by deciphering the progress and impediments of mega-regionals and South-based agreements in Third Regionalism.<sup>12</sup> To buttress the NREO argument, the analysis offers insight into the RCEP's development, negotiating structure and constitutional issues that commentators overlook. By deciphering the legal strategies of ASEAN, China and India, it explains the Global South's contemporary practice of international economic law. Part III substantiates the RCEP's paradigm shifts in Asian regionalism. Based on the implementation of ASEAN+1 FTAs and the AEC, it challenges the loopholes of tariff eliminations and the rules of origin (ROOs) that result in the "noodle bowl syndrome."<sup>13</sup> Given the recent progress of the TPP and EU FTAs with Singapore and Vietnam, it also examines the implications of professional mobility and investor-state dispute settlement (ISDS) provisions.

Part IV details the RCEP's systemic impact on regional and multilateral trading systems. In particular, it sheds light on the transformation of normative conflicts amid trade fragmentation. The overlapping jurisdiction between intra-RCEP FTAs and bilateral investment treaties (BITs) requires in-depth scrutiny of WTO jurisprudence and the Vienna Convention on the Law of Treaties (VCLT). Moreover, the RCEP as the pathway to the APEC-based FTAAP and the pro-development operative mechanism will be critically

<sup>12</sup> Built on Jagdish Bhagwati's explanation of the first two waves of regionalism beginning in the 1960s and 1980s, I coined the term, Third Regionalism, which refers to the new trends of FTAs in the Doha Round. Jagdish Bhagwati, *Regionalism versus Multilateralism*, 15 WORD ECO. 535, 538-42 (1992).

<sup>13</sup> See generally Richard E. Baldwin, *Managing the Noodle Bowl: The Fragility of East Asian Regionalism*, ADB Working Paper Series on Regional Economic Integration, No. 7 (2007).

analyzed. Finally, the conclusion draws together theoretical and substantive arguments and offers legal and policy advice for Asia-Pacific governments and practitioners.

## II. The RCEP in the New Regional Economic Order

The RCEP's impact on Asian regionalism has been arguably intertwined with the China-US rivalry or the North-South divide. Yet, the existing research that discusses the TPP as the "gold standard" FTA for the 21st century, either explicitly or implicitly, has dismissed the RCEP as a low-ambition, unpromising South-driven pact.<sup>14</sup> This position cannot hold true. The populist backlash in America prompted other TPP members to conclude the CPTPP on a much smaller scale and substantiated the significance of the RCEP in global regionalism.<sup>15</sup> It is thus vital to understand the RCEP's evolution vis-à-vis the legal and policy priorities of stake-holding countries in the emerging NREO.

### A. Asian Regionalism in Theoretical and Geopolitical Contexts

The RCEP cannot be interpreted in clinical isolation from the geopolitical volatility of Asian regionalism and the Asian approach to international economic law. As a mega-regional alliance, the RCEP is representative of the NREO in Third Regionalism. The new trend is distinct from the movement that culminated in the 1974 United Nations General Assembly declaration, which called for a New International Economic Order (NIEO).<sup>16</sup> In rationalizing global regionalism, Jagdish Bhagwati propounded the term "First Regionalism" in reference to the failure of FTAs in the 1960s owing to overriding political interferences.<sup>17</sup> He further asserted that in "Second Regionalism," robust economic motivations prompted

---

<sup>14</sup> E.g., Michael Wesley, *Trade Agreements and Strategic Rivalry in Asia*, 69:5 *AUS. J. INT'L AFF.* 479, 489-90 (2015); Deborah Kay Elms, *The Trans-Pacific Partnership Agreement: Looking Ahead to the Next Steps*, ADBI Working Paper Series, No. 447 (2013), at 8-9; Meredith Kolsky Lewis, *The TPP and the RCEP (ASEAN+6) as Potential Paths toward Deeper Asian Economic Integration*, 8:2 *ASIAN J. WTO & INT'L HEALTH L. & POL'Y* 359, 368-69 (2013).

<sup>15</sup> E.g., Iman Pambagyo, *RCEP is the Only Game in Town*, 14 *ASEAN FOCUS* 26, 26-27 (2017). The TPP's ratification problems and the stalled negotiations of US-EU Transatlantic Trade and Investment Partnership (TTIP) made the RCEP a "promising" mega-regional agreement.

<sup>16</sup> Programme of Action on the Establishment of a New International Economic Order (NIEO), A/RES/S-6/3201, May 1, 1974.

<sup>17</sup> Bhagwati, *supra* note 12, at 538-39.

the success of the European single market and the North American Free Trade Agreement (NAFTA) in the 1980s and 90s.<sup>18</sup>

Following the demise of the NIEO, I propose the NREO as the normative framework to understand the contemporary dynamics of FTAs. Built on Bhagwati's account, what I call "Third Regionalism" has surfaced in the Doha Round and fertilized the NREO since the 2000s. This new wave highlights a different nature of Asian regionalism that bolsters the assertive legalism of the Global South. The "new dependency theory" that rectifies the classical dependency theory provides the theoretical basis for the NREO in Third Regionalism in which the RCEP has been developed. The dependency school that influenced the NIEO presupposes the underdevelopment of developing countries as the result of the North-South neocolonial relationship.<sup>19</sup> As theorists contended, entrenched external unfairness has subordinated the development of developing countries to the self-interests of the developed nations.<sup>20</sup> By accelerating the North-bound trade surplus from the South, international economic relations have only worsened the dependency and imparity.<sup>21</sup>

The classical dependency theory posits that the solution for the Global South is to cut trade ties with the North.<sup>22</sup> Nonetheless, the isolationist stance contravened the economic trajectory of developing countries, particularly those that propelled contemporary Asian regionalism. Addressing the theoretical weakness, the new dependency theory argued for the possible coexistence of dependency and development.<sup>23</sup> The nature of dependency is dynamic because developing nations could transform dependent capitalism into the export-driven economies.<sup>24</sup> Rather than becoming preoccupied with the

<sup>22</sup> *Id.* at 104-05.

<sup>23</sup> See generally SO, *supra* note 20, at 164-65; FERNANDO HENRIQUE CARDOSO, REINVENTING DEMOCRACY IN BRAZIL (1999); THOMAS BARON GOLD, STATE AND SOCIETY IN THE TAIWAN MIRACLE (1986).

<sup>24</sup> Based on Taiwan's development model, Gold explained how the country transformed its dependent relations with Japan and the United States to become a neoliberal export-oriented country. GOLD, *supra* note 23, at 21-90; SO, *supra* note 20, at 157-64.

unequal external relationships, the new theory emphasizes the impact of the South's internal structures on changing neocolonial ties with the North.<sup>25</sup>

As the experiences of East Asian and ASEAN states reinforce, dependency is dynamic by nature because the South could escape from dependent capitalism and pursue export-driven growth. New-generation South-South FTAs that streamline the supply chain further augment the cost-effectiveness and the collective power of developing nations to change the structure with the North that was once perceived as unfair. Consequently, the corollaries of the new dependency theory underline the theoretical responses to the South-initiated NREO.

Asian regionalism, which gave rise to the RCEP in the emerging NREO, can trace its roots back to the 1955 Bandung Conference in Indonesia, where anticolonial nationalism of Asian-African states escalated to the Non-Aligned Movement.<sup>26</sup> Peripheral to political solidarity, the economic perception of South-South cooperation was to parochially enforce the nationalistic concept of self-help by minimizing reliance on the West.<sup>27</sup> In the 1970s, Non-Aligned Movement states joined the Group of 77 in pushing for NIEO principles that demanded absolute sovereignty and affirmative action in international economic law.<sup>28</sup> Their efforts through the UN Conference on Trade and Development (UNCTAD) shaped the rules of the General Agreement on Tariffs and Trade (GATT), which the United States and Europe had dominated.

The UNCTAD pushed for including core special and differential treatment (SDT) provisions under the GATT, such as the non-reciprocity exception to the most-favored-nation (MFN) principle and the 1979 Enabling Clause that provides preferential market access for the South.<sup>29</sup> However, the NIEO movement quickly faded because of the Thatcher-Reagan coalition's refusal to additional demands and non-uniform

The contracting parties of the GATT adopted the permanent Enabling Clause after the 1971 decision that granted a ten-year waiver allowing generalized system of preferences to depart from GATT norms. Generalized System of Preferences, Decision of 25 June 1971, L/3545, June 28, 1971.

interests within the Global South.<sup>30</sup> The rising Washington Consensus became the dominant driving force for creating the WTO and compelled developing nations to engage in North-defined “free trade.”<sup>31</sup> Since its inception, the WTO has been criticized for ignoring the development needs of the South.

The NREO is a reaction to the South’s frustrations over the existing global economic order. Two paramount factors in Third Regionalism galvanized the convergence of the Global South’s policies in creating the RCEP. First, the deviation from the US-centric “unipolar moment” to multipolar trade governance became a reality in the Doha Round.<sup>32</sup> Asia’s ascending economies have weakened Washington’s hegemonic power and materialized multipolar reality. In 2016, the Obama government’s “pivot to Asia” strategy culminated in the inking of the TPP, which was seen as an initiative to tackle rising China.<sup>33</sup> However, soaring populist isolationism in the United States has undermined the TPP’s strategic goals and the cross-Atlantic alliance on which the NIEO once relied. The stalled Transatlantic Trade and Investment Partnership (TTIP) negotiations and the EU agreements with ASEAN states have also aggravated the Western powers’ divergent paths.<sup>34</sup>

Second, South-South FTAs concluded between developing countries have departed from the NIEO’s ideological bedrock of the North-South conflicts. As the new dependency theory suggests, developing countries and least developed countries (LDCs), such as Vietnam and Myanmar, diametrically shifted their policies from import substitution to export-driven orientation. Moreover, the West’s economic slowdown

and Asia's increasing intraregional trade led to South-South FTAs representing two-thirds of FTAs and substantially outpacing the North-South FTAs.<sup>35</sup> Different from their predecessors, more than 70% of today's Asian trade pacts encompass WTO-plus commitments.<sup>36</sup> This development illustrates how the assertive legalism of developing nations makes the South the center of the hub-and-spoke system.

## B. The Global South's Practice of International Economic Law

The theoretical and geopolitical explanations shed light on the Global South's search for new norms to guide their international economic law development. In Second Regionalism, APEC's formation escalated aspirations for Asian integration. Nevertheless, the institutional weakness of APEC's soft-law approach has crippled the intended result of the Bogor Goals to achieve "free and open trade and investment in the Asia-Pacific" by 2020.<sup>37</sup> Renewed momentum for regionalism surged after the Asian financial crisis in 1997. Widespread frustrations over US-dominated global financial institutions invigorated the ASEAN+3 framework for currency stability.<sup>38</sup>

At the inception of Third Regionalism, China and Japan vigorously vied for the regional leadership. The East Asian Vision Group, set up under the ASEAN+3 structure, proposed the East Asian Free Trade Area (EAFTA) in 2001.<sup>39</sup> While Beijing backed the EAFTA initiative, Tokyo countered it with the alternative ASEAN+6 Comprehensive Economic Partnership for East Asia (CEPEA) in 2006.<sup>40</sup> In Japan's

In 2015, Asia's intraregional trade was 57.1%, higher than intra-regional trade in North America (64%) and lower than the European Union (EU) (63%). Asian Economic Integration Report (2016), at 18.

<sup>36</sup> See e.g., Richard Baldwin & Masahiro Kawai, *Multilateralizing Asian Regionalism*, ADBI Working Paper Series, No. 431 (2013), at 8-9 (finding that 77% of surveyed FTAs in Asia partially or completely include Singapore issues).

<sup>37</sup> See 1994 Leaders' Declaration, Nov. 15, 1994 (stating that industrialized economies and developing economies should achieve the goals by 2010 and 2020, respectively).

<sup>38</sup> The "ASEAN+3" framework includes ten ASEAN countries, China, Japan and Korea. Shujiro Urata, *Constructing and Multilateralizing the Regional Comprehensive Economic Partnership: An Asian Perspective*, No. 449 (2013), at 7. The result was the creation of the currency swap arrangement called the Chiang Mai Initiative, the predecessor to the Chiang Mai Initiative Multilateralisation Agreement.

<sup>39</sup> Summary of Stock-Taking Report on the ASEAN Plus Three Economic and Financial Cooperation, *in* Report of the East Asian Vision Group II (EAVG) 43, 43-46 (2013); Christopher M. Kent, *East Asian Integration Towards An East Asian Economic Community*, ADBI Working Paper Series, No. 665 (2017), at 23.

<sup>40</sup> In addition, Japan favored the ASEAN+6-based Comprehensive Economic Partnership for East Asia (CEPEA) because it was based on Japan's proposal and it was the work of the Japanese government-funded think tank, the Economic Research Institute for ASEAN and East Asia (ERIA). Rodolfo C. Severino, *Japan's Relations with ASEAN*, *in* ASEAN-JAPAN RELATIONS 17, 27-28 (Takashi Shiraishi & Takaaki Kojima eds. 2014).

view, the CEPEA could deepen the foundation of the Fukuda Doctrine by enhancing ASEAN-Japan ties, and the inclusion of India, Australia and New Zealand would counterbalance Chinese influence.<sup>41</sup>

During the same period, the FTAAP proposal and US accession to the TPP further complicated the roadmap for Asian regionalism.<sup>42</sup> To avoid being marginalized and fortify the bloc's centrality, ASEAN states introduced the framework for the "ASEAN-led process" to integrate FTA partners in 2011.<sup>43</sup> Based on ASEAN's 2012 Guiding Principles for the RCEP, the 16-party negotiations essentially merged EAFTA and CEPEA proposals and expect to create the world's most significant mega-regional deal by 2018.<sup>44</sup> In my view, the converging policies of ASEAN, China and India illustrate the status of the RCEP in Asian economic powers' contemporary practice of international law and represent the assertive legalism of the Global South in pursuing the NREO.

### 1. ASEAN

Contrary to the common misconception that China has dominated RCEP negotiations, in reality the FTA has been driven by ASEAN.<sup>45</sup> While China and Japan could not agree on the EAFTA and the CEPEA proposals, the two largest Asian economies compromised by enabling ASEAN to drive the RCEP process. From legal and political perspectives, relying on the existing frameworks of ASEAN+1 FTAs and the AEC constitutes the most feasible option for the unprecedented mega-regional pact. The ASEAN-initiated RCEP would also serve as a normative basis for pro-development FTAs.

<sup>42</sup> See generally Pasha L. Hsieh, *Reassessing APEC's Role as a Trans-Regional Economic Architecture: Legal and Policy Dimensions*, 16:1 J. INT'L ECO. L. 119, 142-43 (2013); Fergusson & Williams, *supra* note 33, at 1-2.

<sup>43</sup> ASEAN Framework for Regional Comprehensive Economic Partnership (2011).

<sup>44</sup> Guiding Principles and Objectives for Negotiating the Regional Comprehensive Economic Partnership (2012) [Guiding Principles]. The first round of negotiations took place in Brunei in 2013 and the 18<sup>th</sup> round of negotiations was held in Vietnam in 2017. Regional Comprehensive Economic Partnership: News, <http://dfat.gov.au/trade/agreements/rcep/news/Pages/news.aspx> (July 5, 2017). The deadline for the RCEP's conclusion has shifted from 2015 to 2018. Joint Declaration on the Launch of Negotiations for the Regional Comprehensive Economic Partnership (2012); Amiti Sen, *RCEP Talks: India under Pressure to Offer Deeper Tariff Cuts*, HINDU, May 3, 2017, <http://www.thehindubusinessline.com/economy/policy/rcep-talks-india-under-pressure-to-offer-deeper-tariff-cuts/article9679098.ece>.

<sup>45</sup> Maria, *supra* note 5; see also Pambargyo, *supra* note 15, at 27 ("[T]here has been no sign or sense that China has become more pro-active in RCEP negotiations other than a significant increase in the number of participants in the Chinese delegation.").

ASEAN's internal and external integration provides the foundation for the RCEP that covers ASEAN's ten member states and six FTA partners. While the existing literature predominantly links the RCEP to ASEAN+1 FTAs, it is incorrect to ignore the implementation of the AEC.<sup>46</sup> The 1967 Bangkok Declaration gave birth to ASEAN by forming a loose security alliance that sought to contain widespread communism.<sup>47</sup> Resting upon the Indonesian concepts of *musyawarah* and *mufakat*, the postcolonial mind-set led to the "ASEAN way," which established the bloc's non-intervention principle based on consultation and consensus.<sup>48</sup>

The constitutional moment was the enactment of the ASEAN Charter to codify the established practice and confer legal personality on ASEAN "as an inter-governmental" organization.<sup>49</sup> Distinguishable from the super-national EU, ASEAN has operated under the soft-law horizontal integration model rather than a top-down, hard-law approach. A result of this difference is the lack of ASEAN law's "direct effect" to override domestic law. Although the Charter requires members to "take all necessary measures" to implement ASEAN treaties, national constitutions are unlikely to be interpreted as granting such treaties self-executing power.<sup>50</sup>

As an integral part of the RCEP, the AEC represents a breakthrough in the NREO. In 2015, the creation of the AEC culminated ASEAN's internal integration that began with the 1993 ASEAN Free Trade Area (AFTA).<sup>51</sup> The AEC architecture comprises new-generation South-based pacts. To remedy the AFTA's low-utilization, the ASEAN Trade in Goods Agreement (ATIGA) consolidated previous

<sup>49</sup> Charter of the Association of Southeast Asian Nations (2007) [ASEAN Charter], art. 3.

<sup>50</sup> ASEAN Charter, art. 5:2; *see also* Diane A. Desierto, *ASEAN's Constitutionalization of International Law: Challenges to Evolution under the New ASEAN Charter*, 49 COLUM. J. TRANSNAT'L L. 268, 300-03 (2010-11) (interpreting pertinent constitutional provisions of ASEAN states).

<sup>51</sup> SEVERINO, *supra* note 47, at 222-25; Masahiro Kawai & Kanda Naknoi, *ASEAN Economic Integration through Trade and Foreign Direct Investment: Long-Term Challenges*, ADBI Working Paper Series, No. 545 (2015), at 12-13. Note that in 2007, ASEAN approved the ASEAN Economic Community (AEC) Blueprint 2015 with the intention to form "a single market and production base" in 2015. ASEAN Economic Community Blueprint (2015) [AEC Blueprint 2015], at 5-6. The AEC Blueprint 2025, which will govern ASEAN's development from 2016 to 2025, replaced the AEC Blueprint 2015 when the AEC was established. ASEAN Economic Community Blueprint (2025) [AEC Blueprint 2025], at 1-2.

agreements on goods and reduced non-tariff barriers.<sup>52</sup> As of 2017, the negotiations under the ASEAN Framework Agreement on Services (AFAS) have led to the ratification of nine packages of services commitments.<sup>53</sup> The ASEAN Comprehensive Investment Agreement (ACIA) streamlined the schedule of reservations and enhanced the investor-state arbitration mechanism.<sup>54</sup> These commitments and the target of the AEC Blueprint 2025 to build “a highly integrated and cohesive economy” collectively form the benchmark for RCEP negotiations.<sup>55</sup>

A key point should be highlighted. The new Blueprint’s “global ASEAN” initiative places the RCEP as ASEAN’s priority.<sup>56</sup> From 2002 to 2017, ASEAN concluded six ASEAN+1 FTAs with seven Asia-Pacific partners, including Australia, China and India.<sup>57</sup> Akin to the AEC, the ASEAN+1 FTAs have strengthened the notion of ASEAN centrality, which is mandated by the ASEAN Charter to secure the bloc’s economic and geopolitical relevance.<sup>58</sup> This concept empowers ASEAN to be an indispensable middle power in Asian regionalism.<sup>59</sup> Although policy debates on the RCEP have revolved around ASEAN+1 FTAs, their differences in legal structures and commitments could endanger the RCEP. The ASEAN-Australia-New Zealand FTA (AANZFTA) is the most comprehensive single-undertaking FTA.<sup>60</sup> Other ASEAN+1 FTAs have followed the incremental approach by enacting a framework agreement that

<sup>53</sup> Also note that the conclusion of the final, 10<sup>th</sup> package of commitments was postponed from 2015 to 2017. Deunden Nikomborirak & Supunnavee Jitdumrong, *An Assessment of Services Sector Liberalization in ASEAN*, in ASEAN ECONOMIC COMMUNITY SCORECARD: PERFORMANCE AND PERCEPTION 47, 53 (Sanchita Basu Das ed. 2013); Chairman’s Statement on the 28<sup>th</sup> and 29<sup>th</sup> ASEAN Summits, Sept. 6-7, 2016, at 10.

<sup>54</sup> ASEAN Comprehensive Investment Agreement: A Guidebook for Business & Investors (2013), at 9-11.

<sup>55</sup> AEC Blueprint 2025, *supra* note 51, at 3. Presumably due to the challenge meeting all targets in the AEC Blueprint 2015, the new Blueprint dropped the term “single market.”

<sup>56</sup> AEC Blueprint 2025, *supra* note 51, at 35-36.

<sup>57</sup> For the treaty texts, see Free Trade Agreements with Dialogue Partners, <http://asean.org/asean-economic-community/free-trade-agreements-with-dialogue-partners/> (July 7, 2017); Joint Media Statement, The Signing of the ASEAN-Hong Kong, China Free Trade Agreement and the ASEAN, China Investment Agreement (2017) [ASEAN-Hong Kong Statement], at 1.

<sup>58</sup> AEC Blueprint 2025, *supra* note 51, at 2. The development of the ASEAN centrality since the 1990s, see WALTER WOON, THE ASEAN CHARTER: A COMMENTARY 56-58 (2016); Yoshifumi Fukunaga, *ASEAN’s Leadership in the Regional Comprehensive Economic Partnership*, 2:1 ASIA & THE PAC. POL’Y STUDIES 103, 106 (2014).

<sup>59</sup> The ASEAN exercises power as a collective bloc and is thus distinct from traditional middle powers such as Australia and New Zealand. For the definitions of middle powers, see Eduard Jordaan, The Concept of a Middle Power in International Relations: Distinguishing Between Emerging and Traditional Middle Powers, 30:1 *Politikon: South African Journal of Political Studies* 165, 165-75 (2003); Andrew Carr, *Is Australia a Middle Power? A Systemic Impact Approach*, 68:1 *AUS. J. INT’L AFF.* 70, 70-81 (2014).

<sup>60</sup> See *generally* Agreement Establishing the ASEAN-Australia-New Zealand Free Trade Area (2009).

facilitates the conclusion of sectoral agreements on trade in goods, services, investment and dispute settlement. The “incomplete” exception is the ASEAN-Japan FTA that merely finalized the agreement on goods because of Tokyo’s reliance on higher commitments in seven bilateral FTAs with ASEAN states.<sup>61</sup>

Significantly, notwithstanding the treaty-making power provision under the ASEAN Charter, the conferral of the EU concept of competence by member states on ASEAN to conclude treaties does not extend to those that will “create obligations upon individual” states.<sup>62</sup> Thus, the Charter did not alter the negotiating practice of ASEAN+1 FTAs or the RCEP. Seeking the converged position at the “ASEAN Caucus” meeting prior to RCEP negotiations is perceived as a political exercise rather than a legal obligation.<sup>63</sup> Therefore, political consensus among ten ASEAN states is essential to ensure the status of the AEC in the NREO and to fortify the concept of the ASEAN centrality in the RCEP.

## 2. *China*

As part of the Global South, the People’s Republic of China (PRC) has emerged as a global economic power since its open-door policy commenced in 1978. Based on the evolution of socialism with Chinese characteristics, the Beijing Consensus allegedly provides developing nations with an alternative model to the Washington Consensus.<sup>64</sup> China’s trade strategy illustrates its changing international law practice. Its accession to the UN and the WTO was motivated by a desire to assert the legitimacy of the Chinese Communist Party. In Third Regionalism, China has transformed from a passive participant to an assertive stakeholder on global rule-making. The PRC’s new great power status under the principle of “peaceful

<sup>63</sup> *E.g.*, Indicative ASEAN Notional Calendar (2017), at 7. Technically speaking, the Charter only requires states to “coordinate and endeavor to develop common positions.” ASEAN Charter (2007), art. 41:4.

<sup>64</sup> For a detailed analysis of the Beijing Consensus, see *THE BEIJING CONSENSUS? HOW CHINA HAS CHANGED WESTERN IDEAS OF LAW AND ECONOMIC DEVELOPMENT* (Weitseng Chen ed. 2017).

development,” which replaced “peaceful rise” that suggested Sino-centric hegemony, has galvanized the Xi Jinping administration to fill the political vacuum in the wake of US isolationism.<sup>65</sup>

Against this backdrop, three prime considerations underpin China’s legal and political approach to the RCEP and other FTAs. First, as the largest RCEP economy, which accounts for one third of RCEP GDP, this FTA augments China’s right of discourse in international law.<sup>66</sup> China has been a beneficiary of the capitalist, neoliberal trading system. The post-Mao regime has never challenged the normality of the “Western” rules that sustain the system. Instead, China has maximized its influence over global rule-making. Being a core RCEP member allows China to construct the legal pathway to the FTAAP. The Obama-backed TPP once posed threats to Beijing’s strategy. China’s TPP standpoint is exemplified by its acceleration of bilateral FTAs and the RCEP, as well as its experiment with higher-level liberalization in the Shanghai Pilot Free Trade Zone.<sup>67</sup> Ironically, the Trump administration’s withdrawal from the TPP pushed Washington’s Asian allies to embrace the RCEP and enabled Beijing to carry the torch for free trade and globalization.

Second, an interrelated legal controversy is Section 15 of China’s Protocol of Accession to the WTO, which stipulates that the provisions allowing WTO members to treat China as a non-market economy “shall expire 15 years after the date of accession.”<sup>68</sup> The non-market economy status legalized foreign countries’ use of “surrogate” prices in anti-dumping proceedings, thus making it easier to find Chinese exporters liable for dumping.<sup>69</sup> Rather than attacking the normative value of Section 15 that it deems unfair, China has

Compared to the 2015 version, the new negative list has cut 10 items and 27 restrictions across eight industries.”).

<sup>68</sup> Protocol on the Accession of the People’s Republic of China, WT/L/432, Nov. 23, 2001, sec. 15(d).

<sup>69</sup> Spokesman of the Ministry of Commerce Comments on China’s Indicting the US and European Union for their Practices of Anti-dumping “Surrogate Country” in the WTO, Dec. 13, 2016, <http://english.mofcom.gov.cn/article/newsrelease/significantnews/201612/20161202192355.shtml>.

resorted to FTAs to circumvent the provision. The ASEAN-China FTA illustrates such efforts, as it accords China “full market economy” status to the exclusion of WTO rules.<sup>70</sup>

Despite the statutory expiration of Section 15 in December 2016, the United States, the EU and Japan declined to alter the non-market economy methodology owing to political sensitivity involving the inflow of Chinese goods.<sup>71</sup> In response, Beijing filed concurrent WTO complaints against Washington and Brussels.<sup>72</sup> The RCEP could compel Japan to accept the ASEAN-China FTA practice of recognizing China as a market economy and thus marginalize US and EU positions in the interpretation of world trade law.

Lastly, the RCEP will advance China’s economic interests in the NREO. Empirical data demonstrate that the Chinese economy alone could gain \$88 billion if the TPP failed and the RCEP were passed, and this amount is \$16 billion more than the scenario where both mega-regionals came into effect.<sup>73</sup> The RCEP is a key instrument to implement China’s 13th Five-Year Plan, in which the National People’s Congress first placed the “One Belt, One Road” initiative as a national priority in 2016.<sup>74</sup> This initiative fortifies China’s long-standing approach to South-South cooperation that emphasizes concessional loans for infrastructure building to facilitate the export of Chinese production, capital and labor.

Contrary to the assertion of Beijing and pro-government academics, I argue that OBOR is primarily based on ambitious yet ambiguous policy statements that are far from legal commitments.<sup>75</sup> What was patently ignored in discourse is the financial risks that could arise from investment in many of the 68 OBOR

<sup>74</sup> The One Belt, One Road (OBOR) initiative is based on Chinese President Xi’s announcement of “the Silk Road Economic Belt” and “the 21<sup>st</sup>-century Maritime Silk Road” in Kazakhstan and Indonesia, respectively, in 2013. Chronology of China’s Belt and Road Initiative, Xinhuanet, Mar. 28, 2015, [http://news.xinhuanet.com/english/2015-03/28/c\\_134105435.htm](http://news.xinhuanet.com/english/2015-03/28/c_134105435.htm). See Katherine Koleski, *The 13th Five-Year Plan, U.S.-China Economic and Security Review Commission* (2017), at 1 & 22 (indicating the goal of the initiative is to “export China’s enormous excess industrial capacity and strengthen debt-laden SOEs’ international competitiveness”).

<sup>75</sup> E.g., Action plan on the Belt and Road Initiative (2015). China and Hong Kong-based academics have attempted to link OBOR to business, investment and tax laws. Legal Dimensions of China’s Belt and Road Initiative (Lutz-Christian Wolff & Chao Xi eds. 2016).

members such as Iraq and Palestine.<sup>76</sup> OBOR's few substantive results include the creation of the China-led Asian Infrastructure Investment Bank (AIIB), which fills Asian states' infrastructure needs that global financial institutions fail to meet. As more than 60 members joined the AIIB, including all RCEP countries except Japan, the bank will facilitate ASEAN+6 economic cooperation through its development projects.<sup>77</sup>

OBOR also ascended to the PRC State Council's new FTA strategy, which goes beyond trade commitments and extends to e-commerce and environmental protection.<sup>78</sup> Four of China's FTAs encompass 13 RCEP members.<sup>79</sup> The ASEAN-China FTA is indicative. As Asia's largest South-South FTA that is currently in force, the ASEAN-China FTA was created under a framework agreement and four subsequent agreements signed between 2002 and 2009.<sup>80</sup> Despite criticism of its low liberalization level, the ASEAN-China FTA's "living agreement" design led to the 2011 second package of services commitments and the 2015 protocol to upgrade goods and investment commitments.<sup>81</sup> Moreover, instead of joining the ASEAN-China FTA, Hong Kong concluded a free-standing FTA with ASEAN in November 2017.<sup>82</sup> The ASEAN-Hong Kong FTA, the amended ASEAN-China FTA, and China's recent FTAs with Australia and Korea will shape the RCEP in line with OBOR.

### 3. India

India was the key stakeholder of the Bandung Conference and the Non-Aligned Movement that championed South-South cooperation.<sup>83</sup> In the 1990s, the bipartisan consensus formulated the Look East Policy in order to forge the neglected economic link to East Asia and counteract the rise of China.<sup>84</sup> This post-Cold War strategy substantiated the ASEAN-India Framework Agreement and bilateral FTAs with three ASEAN countries, Japan and Korea.<sup>85</sup> Despite these legal efforts, India is yet to be at the core of Asian regionalism. New Delhi is not an APEC member and it stands outside the vertically-integrated supply chain of the East Asian market.<sup>86</sup> Economic data evidence India's *de facto* isolation from ASEAN. China and Korea constitute 15.2% and 5.4% of ASEAN's total trade, respectively, but India accounts for merely 2.6%.<sup>87</sup> While ASEAN primarily trades electrical devices with Asia-Pacific countries, ASEAN-India trade predominantly involves raw materials, such as dairy and mineral products.<sup>88</sup>

In Third Regionalism, India's most compelling move is Prime Minister Narendra Modi's "Act East Policy," which was declared in Myanmar in 2014.<sup>89</sup> The new policy adopts a more action-based approach than its predecessor by reinvigorating defense and economic ties with Asian trading partners. Thus, the RCEP serves as the vehicle for India to be included in Asia-Pacific integration and benefits the "Make in India" campaign to make the nation a manufacturing and services hub.<sup>90</sup> The mega-regional pact will provide Indian businesses with market access to Australia and China. More importantly, akin to Beijing's motivation, the shaping of the RCEP empowers New Delhi to be recognized as a great power in global rule-making.

<sup>89</sup> Prashanth Parameswaran, *Modi Unveils India's 'Act East Policy' to ASEAN in Myanmar*, Nov. 17, 2014, <http://thediplomat.com/2014/11/modi-unveils-indias-act-east-policy-to-asean-in-myanmar/>.

<sup>90</sup> See generally *id.*; Sara Itagaki, *Understanding India's Evolving Role in Asia through an ASEAN Prism, Policy Q&A*, The National Bureau of Asian Research (2016).

For RCEP countries, India's participation in the pact presents opportunities and risks. The RCEP legal framework that accommodates India and ASEAN's LDCs, Cambodia, Laos, Myanmar and Vietnam (collectively known as CLMV countries) presents the normative foundation for the Global South. Given China's economic slowdown, India's astonishing 7% GDP growth rate and infrastructure needs will yield additional trade gains.<sup>91</sup> The jeopardy arises from Sino-Indian clashes that range from border disputes to leadership competition, which echoes China's discord with Japan as to the pathways to Asian regionalism. To check Chinese dominance, Singapore and Vietnam within ASEAN have actively called for India's greater role.<sup>92</sup> Markedly, India did not join the Beijing-led OBOR.<sup>93</sup> The Modi-Abe alliance created the Asia-Africa Growth Corridor that resembles OBOR by focusing on infrastructure projects and capacity building.<sup>94</sup> Such interstate dynamics inevitably influence the RCEP progress.

India's conservative stance on trade liberalization has led Beijing to accuse New Delhi of "selfishly" obstructing RCEP negotiations and prompted ASEAN states to consider the "ASEAN Minus X" formula.<sup>95</sup> India's insistence on the RCEP's single-undertaking structure departs from the ASEAN-India FTA, which is modeled after the ASEAN-China FTA's incremental building-block approach.<sup>96</sup> The ASEAN-India

TIMES, Jan. 18, 2017, <http://economictimes.indiatimes.com/news/politics-and-nation/india-selfishly-blocking-rcep-pact-chinese-media/articleshow/56644605.cms>. The ASEAN-X formula, which had been discussed on a limited scale at the RCEP meetings, was proposed by the Philippines, the ASEAN Chair in 2017. Pambagyo, *supra* note 15, at 27; Catherine Pillas, *Asean Minus X formula to fast-track RCEP-PHL*, BUS. MIRROR, May 8, 2017, <http://www.businessmirror.com.ph/asean-minus-x-formula-to-fast-track-rcep-phl/>.

<sup>96</sup> The single undertaking approach will lead to a single, comprehensive FTA that covers core areas of goods, services and investment. See Amiti Sen, *RCEP: India Gets Trade Ministers on Board on 'Single Undertaking' for Goods, Services*, HINDU BUS. LINE, Nov. 7, 2016, <http://www.thehindubusinessline.com/economy/rcep-india-gets-trade-ministers-on-board-on-single-undertaking-for-goods-services/article9316063.ece>.

services and investment agreements were only concluded in 2014, 11 years after the inking of the framework agreement.<sup>97</sup> The prolonged process reflects India's irreconcilable politics of protectionism.

On the WTO front, India applies MFN tariff rates up to 150% to support its domestic agriculture.<sup>98</sup> In the ASEAN-India FTA, Indian agricultural projects are mostly immune to liberalization because they are either excluded or scheduled under the sensitive track.<sup>99</sup> India has been the WTO forerunner for liberalizing labor mobility, known as Mode 4 within the definition of the General Agreement on Trade in Services (GATS).<sup>100</sup> This position facilitates the exportation of Indian professional services in information technology (IT) and other areas. As the ASEAN-India FTA has exacerbated deficits in trade in goods without generating sufficient services exports, the Modi government "will not repeat the mistake" in ASEAN-Indian negotiations.<sup>101</sup> Hence, New Delhi demanded the single-undertaking formula adopted for the AANZFTA, so that concessions for tariff cuts will be tied to the potential gains for services market access.

As for controversial intellectual property (IP) provisions, the Indian position conflicts with Japan's and Korea's proposals that intend to "TPP-nize" the RCEP standards.<sup>102</sup> A key example is the protection of data exclusivity under the TPP. Article 18.50 of the TPP, which the CPTPP suspended, exceeds the requirement of Article 39 of the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights

(TRIPS).<sup>103</sup> Pharmaceutical companies normally invest dramatically in developing clinical trial data. For a fixed period of time, the TRIPS-plus protection obliges countries to prohibit such data from being utilized by subsequent manufacturers for generic drugs. Data exclusivity would give a monopoly to developed nations' corporations and significantly undermine the granting of compulsory licenses for handling public health crises, including India's tuberculosis epidemic.<sup>104</sup> The RCEP's draft investment chapter that incorporates IP rights in the definition of investments eligible for ISDS further fortifies India's resistance.<sup>105</sup> These issues illustrate India's legal considerations that may compromise RCEP commitments.

### III. Key Components of RCEP Negotiations

By making interrelated theoretical and substantive claims, this article presents the NREO as the new normative framework for understanding Third Regionalism. Different from the NIEO that is preoccupied with the North-South conflicts, the RCEP represents the NREO that facilitates South-South FTAs. The theoretical underpinning of the NREO is thus reinforced by the assertive legalism of the Global South in transforming the dependency dilemma into active FTA policies.

Notably, the Guiding Principles have influenced the RCEP's legal structure. First of all, *de jure* integration that replaces intra-RCEP trade pacts is not intended. Instead, the RCEP will improve five ASEAN+1 FTAs, and it will not "detract from" commitments under existing FTAs.<sup>106</sup> This approach poses the challenges to eliminate the noodle bowl syndrome of Asian FTAs. In addition, given "the different levels of development," the RCEP will allow for flexibility by incorporating SDT provisions.<sup>107</sup> As RCEP members accepted India's request for adopting the single-undertaking approach, the degree of policy space accorded to LDCs will be a critical trade-off for partners to reach consensus.<sup>108</sup>

<sup>107</sup> *Id.* principle 4.

<sup>108</sup> Sen, *supra* note 96.

Political complexity and capacity constraints have added further complications to the RCEP. As of 2017, RCEP negotiations were finalized for the chapter on economic and technical cooperation and the chapter on small and medium-sized enterprises.<sup>109</sup> The core components that require the “Grand Bargain” to involve trade in goods, trade in services and investment will determine whether the RCEP can be completed as the new “ASEAN++” architecture by 2018.<sup>110</sup> The increase from 60 to 800 negotiators from 16 countries illustrates the complexity of RCEP talks.<sup>111</sup> The insertion of ongoing negotiation of the China-Japan-Korea FTA into RCEP negotiations made the dynamics more intricate.<sup>112</sup> Equally significant, certain governments’ limited capacity has hindered officials from negotiating ROOs and trade facilitation in parallel working group meetings.<sup>113</sup> Another hindrance is that political issues, which cause conflicts between trade liberalization and constitutional constraints, can only be handled at the ministerial level.<sup>114</sup>

Below I will analyze the legal implications for the RCEP’s critical areas. From a comparative law perspective, the trade in goods issues are to be discussed with uneven tariff concessions and low utilization rates of ASEAN+1 FTAs, as well as the impact of the RCEP on fragmented ROOs. Services commitments are to be discussed with constitutional challenges and ASEAN’s legal structure of professional mobility. By examining the legal positions of Australia, China, India, Indonesia and the EU, investment matters focus on the contentious investor-state arbitration mechanisms.

#### A. Tariff Eliminations and the Rules of Origin

Tariff cuts are the most transparent aspect of trade liberalization. The existing analyses on tariff eliminations under ASEAN+1 FTAs often neglect the drastic tariff reductions in the ASEAN Economic Community. To achieve the RCEP’s goal of “the high level of tariff liberalization” and consolidation of

<sup>114</sup> There are three working levels at RCEP negotiations: Working Groups for technical issues, the Trade Negotiation Committee for policy/legislative issues and the Ministers for political/constitutional issues. *Id.* at 12.

Asian FTAs, going beyond the tariff concessions under ASEAN+1 FTAs and the intra-ASEAN ATIGA is paramount.<sup>115</sup> A comparison of five external FTAs readily demonstrates that the AANZFTA is the most liberalized FTA, achieving 95.7% of the average tariff elimination coverage.<sup>116</sup> The result is by no means a surprise, given the developed nation status of Australia and New Zealand and their progressive FTA trajectories.

In contrast, India's conservative posture made the ASEAN-India the lowest-level FTA, with 79.6% coverage.<sup>117</sup> Under the ASEAN-India FTA, the average coverage of ASEAN states exceeds 90%, but Indonesia's tariff liberalization is merely 48.7%.<sup>118</sup> The AEC's most noteworthy achievement is ASEAN-6 countries' elimination of 98.9% of tariff lines and CLMV countries' phase in of remaining duties for sensitive products by 2018.<sup>119</sup> Consequently, I propose that the AANZFTA and the ATIGA should serve as the bases for RCEP tariff commitments.

Streamlining tariff eliminations of India, Indonesia and CLMV countries would make the RCEP the model for South-based FTAs. As evidenced by the ASEAN-India FTA and the bilateral FTAs of Japan and Korea with ASEAN countries, agricultural trade liberalization is key to the RCEP.<sup>120</sup> The AANZFTA provides the best practices, as it eliminated tariffs on substantial agricultural products when the agreement took effect.<sup>121</sup> To be a comprehensive FTA, the RCEP's breakthrough in agriculture relies upon two key factors: the tariff elimination timeframes and potential market access.

<sup>120</sup> *See* Timothy E. Josling, *Agriculture*, in *BILATERAL AND REGIONAL TRADE AGREEMENTS: COMMENTARY AND ANALYSIS* 171, 194 (Simon Lester et. al. eds. 2015) (explaining Japan's FTA with Thailand and the Philippines and Korea's FTA with Thailand).

<sup>121</sup> Tariff eliminations take place from 2010 to 2020. Masahiro Kawai & Ganeshan Wignaraja, *Asian FTAs: Trends, Prospects, and Challenges*, ADB Economics Working Paper Series, No. 226 (2010), at 16; OECD Review of Agricultural Policies OECD Review of Agricultural Policies: Indonesia (2012), at 192.

The tariff phase-in periods, which extend to 18 years under the ASEAN-Japan FTA and 30 years under the TPP, exemplify critical trade-offs for the RCEP.<sup>122</sup> In terms of market access, keeping Japan's TPP commitment that raises its quota for Australian rice would be linked to the export of Japanese vehicles.<sup>123</sup> In 2016, India proposed a three-tiered tariff approach that grants RCEP countries 42.5%-80% tariff cuts, depending on three different categories.<sup>124</sup> The motivation was India's defensive position on agriculture and the significant \$52.7 billion trade deficit with China.<sup>125</sup> New Delhi subsequently dropped the proposal because of RCEP members' objections and India's reassessed gains in services and investment under the pact.

As the largest mega-regional initiative, the RCEP's harmonization of ASEAN+1 FTAs and the ATIGA impacts the businesses' utilization of the FTAs. In comparison, NAFTA's usage rate surpasses 60%, but the utilization rate of Asian FTAs is only 28%.<sup>126</sup> The strikingly low usage of ASEAN+1 FTAs, such as 5.1% of the ASEAN-India FTA for exporters and 2.3% of the ASEAN-Japan FTA for importers, has nullified the legal efforts for preferential tariff treatment.<sup>127</sup> The most used ASEAN FTAs are the ATIGA in exports and the ASEAN-China FTA in imports, with a utilization rate of only slightly above 30% for each.<sup>128</sup> Conventional answers to this problem are the limited access to the FTA information, low preference margins compared with MFN tariffs and complex ROOs.<sup>129</sup> An oft-neglected factor is the expanded commitments of the Information Technology Agreement, a plurilateral WTO agreement that

eliminates tariffs on IT products.<sup>130</sup> As 11 RCEP partners are parties to the Agreement, zero tariff treatment for electronic devices renders the use of FTAs redundant.<sup>131</sup>

Complex and distinct ROOs in overlapping Asian FTAs have contributed to the noodle bowl syndrome and inhibited FTA usage. Built on the ROO reform agenda in the AEC Blueprint 2025, the RCEP should consolidate the best practices of regional ROOs.<sup>132</sup> Change in Tariff Classification (CTC) and Regional Value Content (RVC) are the most common ROOs in ASEAN FTAs.<sup>133</sup> While the former qualitatively assesses whether the products are classified under tariff schedules different from original materials, the latter quantitatively examines whether the products meet the FTA value-added thresholds.<sup>134</sup>

Failure to meet the ROOs would disqualify exporters from receiving the certificate of origin for FTA preferences. The ATIGA and most ASEAN+1 FTAs have adopted the flexible co-equal rule, which permits ROOs to be satisfied by either the CTC or the RVC.<sup>135</sup> The ASEAN-India FTA is now the sole exception to the rule after the 2015 protocol to the ASEAN-China FTA that had its ROO requirement relaxed to a CVC or RVC of 40%.<sup>136</sup> In terms of the certificates of origin, all of the five ASEAN+1 FTAs have permitted third-country invoicing and movement certificates, so that exporters can manage foreign exchange risks and logistics operations.<sup>137</sup> These evolved practices and harmonized ROOs provide the model for the RCEP.

<sup>135</sup> The ATIGA's rules of origin (ROO) are based on the rules of ASEAN Free Trade Area (AFTA). In 2003, the AFTA Council changed ASEAN's ROO, which was limited to the regional value content of 40%, to include the change in tariff classification. Joint Media Statement of the 17th AFTA Council Meeting (2013), paras. 11-12; INAMA & SIM, *supra* note 52, at 27.

<sup>136</sup> A Guide to Understanding the ASEAN-China Free Trade Area Upgrade (2016), at 2; *see also* Kim, *supra* note 134, at 1361 (explaining the restrictiveness of the "RVC 35% and CTSH" rule under the ASEAN-India FTA).

<sup>137</sup> The various certificates of origin in ASEAN FTAs, see Kohei Shino, *How Far Will Hong Kong's Accession to ACFTA Impact its Trade in Goods*, ERIA Discussion Paper Series (2013), at 12-19; Erlinda M. Medalla & Maureen Ane D. Rosellon, *Rules of Origin in ASEAN+1 Free Trade Agreements and the Supply Chain in East Asia*, in ASEAN AND REGIONAL FREE TRADE AGREEMENTS 171, 180 (Christopher Findlay ed. 2015).

Additionally, the RCEP will consolidate the regional supply chain by filling the ROO gap among ASEAN FTAs. To illustrate, Chinese automotive companies plan to expand their operations in Thailand by assembling completely knocked-down units imported from China and exporting finalized cars to Indonesia and Australia.<sup>138</sup> The ROOs of the AANZFTA, the ATIGA and the ASEAN-China FTA apply the RVC of 40% for automotive parts and vehicles.<sup>139</sup> While the completed cars sold in ASEAN are entitled to ATIGA or ASEAN-China FTA preferences, those exported to Australia may be denied preferential tariffs under the AANZFTA. The legal obstacle occurs because the AANZFTA's "cumulative provision" does not recognize the value of the cars' Chinese components for the RVC calculation.<sup>140</sup> In other words, the lack of the linkage between the ATIGA and ASEAN+1 FTAs obstructs the needs of contemporary transactions. Consequently, an ASEAN+6 cumulative provision under the RCEP will consolidate ASEAN FTAs and propel the paradigm change in Asian regionalism.

## **B. Services Liberalization and Professional Mobility**

The significance of trade in services is no less than that of tariff eliminations. In Third Regionalism, financial and logistics services underpin cross-border trade in goods. The intimate correlation between the two modes of trade is evidenced by a 10% growth in trade in services augmenting trade in goods by 6%.<sup>141</sup> To implement RCEP countries' commitments to the UN Sustainable Development Goals, services trade is essential to development policy that eradicates poverty and increases employment.<sup>142</sup> For RCEP members such as Malaysia and Thailand, modernizing services will enable them to escape from the "middle income

---

<sup>138</sup> I use SAIC Motor's business plan as an example. Hiroshi Kotani, *China's SAIC Motor to Make Thailand an Export Hub*, NIKKEI ASIAN REV., May 17, 2017, <https://asia.nikkei.com/Business/AC/China-s-SAIC-Motor-to-make-Thailand-an-export-hub>.

<sup>139</sup> Erlinda M. Medalla & M. Supperamian, *Suggested Rules of Origin Regime for EAFTA*, Discussion Paper Series, No. 2008-22 (2009 rev.), at 15; Annex 2 (Product Specific Rules), as Amended by the First Protocol, Agreement Establishing the ASEAN-Australia-New Zealand FTA [AANZFTA], at 590-91.

<sup>140</sup> AANZFTA, ch. 3, art. 6. Cumulative provisions in other ASEAN+1 FTAs, see Baldwin & Kawai, *supra* note 36, at 18. Another important step is for the RCEP to clarify the roll-up concept in applying the cumulative provision. Article 54.2 of the ATIGA does not provide clear guidance. INAMA & SIM, *supra* note 52, at 22-23. *See also* Trade Policy Review: Report by the Secretariat: Singapore, WT/TPR/S/343, June 7, 2016, at 20 (elaborating that the EU-Singapore FTA permits "the sourcing from other ASEAN countries as originating content" for selected products).

<sup>141</sup> Juan Blyde & Natalia Sinyavskaya, *The Impact of Liberalizing Trade in Services on Trade in Goods: An Empirical Investigation*, 11:3 REV. DEV. ECON. 566, 573 (2007).

<sup>142</sup> The Sustainable Development Goals that took effect in 2016 were built upon Millennium Development Goals that governed the development agenda from 2000 to 2015. Draft Outcome Document of the United Nations Summit for the Adoption of the Post-2015 Development Agenda, A/69/L.85, Aug. 12, 2015, at 3-27.

trap” that stagnates economy due to the eroding labor-intensive advantage.<sup>143</sup> In developing countries and LDCs, foreign direct investments (FDIs) are increasingly associated with services providers that help buttress the welfare of the poor through job creation.<sup>144</sup> Labor mobility results in remittances, which also benefit the Global South for development purposes.

The TPP’s unforeseen future and the fact that no ASEAN countries are participating in the WTO Trade in Services Agreement (TiSA) negotiations enable the RCEP to set the standards for Asian FTAs.<sup>145</sup> Based on “the GATS and ASEAN+1 FTAs,” the RCEP’s target is to “substantially eliminate” barriers to services trade.<sup>146</sup> To ensure ASEAN centrality, the RCEP should take evolving AFAS commitments into account. The AFAS’s “package” structure is similarly incorporated in ASEAN’s FTAs with China and Korea.<sup>147</sup> ASEAN+1 FTAs cover services commitments except for the ASEAN-Japan FTA.<sup>148</sup> Although the 2014 ASEAN-India Services Agreement is the latest services pact in external FTAs, its core commitments in financial and transport services rarely exceed the WTO level.<sup>149</sup>

Contrary to the conventional understanding that ASEAN states committed most in the comprehensive AANZFTA, intra-ASEAN commitments in the seventh package of AFAS commitments for the first time exceeded those under the AANZFTA.<sup>150</sup> Moreover, although the low degree of the first package of commitments under the ASEAN-China FTA suffers from “GATS-minus” situations, the second package

<sup>149</sup> The analysis of services commitments made by India and ASEAN states, see Factual Presentation: Agreement on Trade in Services between India and the Association of Southeast Asian Nations (Services), WT/REG372/1, Aug. 22, 2016, at 18-37.

<sup>150</sup> Fukunaga & Isono, *supra* note 6, at 16. Although ASEAN states concluded the ninth package of commitments under the ASEAN Framework Agreement on Services (AFAS), the most current AFAS data are based on the eighth package of commitments. RCEP Slides, *supra* note 111, at 10; Hikari Ishido, *Harmonization of Trade in Services by APEC Members*, IDE Discussion Paper, No. 410 (2013), at 8-16.

has brought it up to par with the ASEAN-Korea FTA.<sup>151</sup> These developments exhibit that AFAS commitments should form the benchmark for the RCEP. The package structure could also prevent repeating the TPP and TTIP mistakes to aim to achieve comprehensive or high-standard services liberalization without an incremental approach in light of protectionist politics.

With respect to the modality of services liberalization, the AFAS and ASEAN+1 FTAs adopt the GATS-like positive list approach, whereas EU and US FTAs, such as the TPP, employ the negative list approach. While the positive list modality allows FTA partners to retain regulatory sovereignty to schedule services commitments, the more aggressive negative list approach will enhance transparency and cover newly developed services.<sup>152</sup> Remarkably, the China-Korea FTA signals China's first use of the negative list approach and indicates its changing position in services commitments.<sup>153</sup> In the bilateral FTA, China and Australia scheduled their commitments on positive and negative lists, respectively.<sup>154</sup> However, Beijing agreed to follow the negative list modality in the subsequent round of negotiations.<sup>155</sup>

A different hybrid mechanism is included in the positive list-based Malaysia-New Zealand FTA, under which Malaysia agreed to "commence re-negotiation of the specific commitments" if it concludes an agreement on a negative list with a third country.<sup>156</sup> These dynamics and the collective lobbying of four TiSA members influenced the RCEP to be negotiated under an innovative positive list formula with "value added" components.<sup>157</sup> This approach provides guidance for South-based regionalism because it incorporates negative list advantages without overly compromising regulatory sovereignty. New

components include the “ratchet” that imposes a standstill by disallowing future governments from adopting more restrictive measures, as well as the MFN-forward design, which requires a RCEP country to automatically extend any services concessions under its prospective bilateral agreements to other RCEP members.<sup>158</sup>

As for substantive commitments, the RCEP will be modeled after the GATS and the AFAS that cover four modes of the services trade: Mode 1 (cross-border supply), Mode 2 (consumption abroad), Mode 3 (commercial presence), and Mode 4 (movement of natural persons or MNP).<sup>159</sup> ASEAN+1 FTAs reflect the WTO trend. Mode 2, which seldom involves hard bargains, is most committed, whereas professional mobility under Mode 4 is least committed.<sup>160</sup> The existing literature rarely addresses the potential constitutional challenges to services negotiations. For example, Article 12 of the Philippine Constitution and Article 33 of the Indonesian Constitution mandate that natural resources be “owned by” or “controlled by the State.”<sup>161</sup> These provisions may outlaw the RCEP’s Mode 3 foreign equity reforms in mining and forest sectors. The Philippines’ constitutional principle that confines professional practice to citizens equally challenges Mode 4 liberalization.<sup>162</sup> The RCEP’s external pressure to remove constitutional obstacles will similarly benefit ASEAN integration.

In my view, to accelerate much-needed professional mobility in the Asia-Pacific and refute the prevalent low-level contention, the RCEP should be built upon the AEC’s Mode 4 commitments and mutual recognition arrangements (MRAs). This focus will create TPP-plus benefits for the Global South. Other than the poverty reduction effect of remittances, circular migration has brought back skills that modernize the economies of the original countries.<sup>163</sup> Despite the pro-development effect, the WTO’s liberalization

over the MNP was restrictive because of the concern about creating the back door to immigration. This unfounded misconception has also amounted to global protectionism.

In terms of Mode 4, US FTAs turned drastically conservative after Singapore and Chile FTAs allocated additional quotas for work visas.<sup>164</sup> Among ASEAN+1 FTAs, the AANZFTA is by far the only one that includes an MNP chapter.<sup>165</sup> Even the most recent ASEAN-India Services Agreement merely provides definitions of natural persons without substantive MNP provisions.<sup>166</sup> On the bilateral level, the most notable example is the movement of nurses and care workers under Japan's FTAs with four ASEAN states.<sup>167</sup> Nevertheless, limited sectors in the commitments and legal obstacles, such as qualification and language requirements, have impeded the intended results.<sup>168</sup>

The RCEP negotiators have discussed the possibility of including a MNP chapter or annex.<sup>169</sup> The AEC's goal to facilitate the movement of "skilled" labor rather than more general migration provisions could provide guidance for the mega-regional agreement.<sup>170</sup> Under the AEC Blueprint 2025, the ASEAN MNP Agreement and MRAs liberalize professional mobility.<sup>171</sup> The Agreement, which will supersede AFAS Mode 4 commitments, encompasses services trade on a non-permanent basis. To avoid immigration concerns, it resembles the GATS by excluding ASEAN governments' "measures affecting natural persons seeking access to the employment market" and "measures regarding citizenship, residence or employment

<sup>165</sup> See R.V. Anuradha, *Liberalization of Trade in Services under RCEP: Mapping the Key Issues*, 8:2 ASIAN J. WTO & INT'L HEALTH L. & POL'Y 401, 416-7 (2013) (explaining Modes 3 and 4 in Asian FTAs).

<sup>166</sup> Factual Presentation: Agreement on Trade in Services between India and the Association of Southeast Asian Nations (Services), *supra* note 149, at 16.

<sup>167</sup> While the Japan-Thailand FTA only provides a framework for future negotiations, Japan's FTAs with Indonesia, the Philippines and Vietnam include commitments on nurses and caretakers. Trade Policy Review: Report by the Secretariat: Japan, WT/TPR/S/351, Jan. 18, 2017, at 125-27.

<sup>168</sup> To gain better residency conditions, ASEAN workers that entered Japan under FTAs are required to take the examinations. However, "[t]he rate of success . . . is around 35% for caretakers and slightly over 10% for nurses." *Id.* at 126-27.

<sup>169</sup> See also RCEP Services Chapter, *supra* note 157, at 6 (noting that "ASEAN has no consensus position on this issue yet" and "India had submitted a text for MNP" previously).

<sup>170</sup> AEC Blueprint 2025, *supra* note 51, at 10-11; ASEAN Agreement on the Movement of Natural Persons (2012) [ASEAN MNP Agreement], preamble.

<sup>171</sup> AEC Blueprint 2025, *supra* note 51, at 10-11; AEC 2025 CSAP, *supra* note 82, at 10-11.

on a permanent basis.”<sup>172</sup> In other words, the governments retain their regulatory power to maintain visa requirements for public purposes, provided that the treaty benefits are not impaired.<sup>173</sup>

Furthermore, the implementation of ASEAN MRAs that cover eight professions provide valuable experiences.<sup>174</sup> Compared with APEC and TPP’s soft-law schemes, the ASEAN pacts on engineering and architecture services are most conspicuous.<sup>175</sup> The regional level professional institutions and national regulatory bodies have created a three-step registration process. For instance, an engineer who meets the educational and experience requirements can be first certified by the domestic body, which submits the application to the ASEAN committee.<sup>176</sup> Upon approval as an “ASEAN Chartered Professional Engineer,” the engineer is qualified to apply to be a foreign engineer in another ASEAN country.<sup>177</sup>

The ASEAN MRA on tourism professionals exemplifies a rare scheme that facilitates “unregulated” services due to the absence of international standards for tourism services providers. The MRA not only created a database to assist registered tourism professionals, but also consolidated the regional tourism industry by developing competency standards for 32 job titles.<sup>178</sup> ASEAN’s experiences in Mode 4 liberalization and MRAs are integral to the RCEP, which aims to achieve “comprehensive” services commitments.<sup>179</sup> Given the procrastinated status of the TPP and the TiSA, the AEC’s consolidation of

commitments in the prospective ASEAN Trade in Services Agreement will further prompt the RCEP to fortify services trade in the Asia-Pacific.<sup>180</sup>

### C. Investor-State Dispute Settlement

Trade in goods, trade in services and investment form cardinal pillars of the RCEP. Investment law and policy is critical to FDI inflows that catalyze pro-poor development in the Global South. Given the slowing Chinese economy, ASEAN overtook China in attracting FDI for the first time in 2013.<sup>181</sup> Under the AEC Blueprint 2025, ASEAN will strengthen the ACIA-based investment regime to enhance its regional competitiveness.<sup>182</sup> As of 2017, ASEAN and other six countries agreed to expedite bilateral or plurilateral negotiations, including investment liberalization, on a request and offer basis.<sup>183</sup>

One should note that the signing of the ASEAN-India Investment Agreement left the ASEAN-Japan FTA the sole ASEAN+1 FTA without an investment component.<sup>184</sup> RCEP negotiations on investment “promotion, protection, facilitation and liberalization” are built upon the intra-ASEAN ACIA and external ASEAN FTAs.<sup>185</sup> Nevertheless, these instruments vary in substantive provisions on covered investments, MFN and national treatment, and compensation following expropriation.<sup>186</sup> The most contentious investment issue that may amount to a “deal breaker” is ISDS provisions, which entitle foreign investors to sue host states in international judicial bodies. ISDS was initially designed to overcome the local court bias and the hurdle for exercising diplomatic protection by investors’ home states in public international law. The ICSID Convention crystalized the multilateral efforts to adjudicate investor-state disputes under the

---

auspices of the World Bank.<sup>187</sup> However, four RCEP members (India, Laos, Myanmar and Vietnam) are not parties to the Convention.<sup>188</sup>

In line with the universal trend, Asian BITs and FTAs often include ISDS provisions because they are perceived to incentivize investments.<sup>189</sup> The ACIA and ASEAN+1 FTAs follow the modality of the US Model BIT and the NAFTA and go beyond earlier BITs by incorporating more detailed arbitration procedures than the ICSID Convention.<sup>190</sup> In reality, the “ASEAN way” and the fear of undermining relations with the governments have deterred foreign investors from filing complaints against host states. *Yaung Chi Oo v. Myanmar* remains the only case that arose from ASEAN FTAs.<sup>191</sup> A Singaporean company challenged the Myanmar government’s expropriation of a joint venture brewery, but the Tribunal dismissed the case on jurisdictional grounds based on the interpretation of pre-ACIA agreements.<sup>192</sup>

In Third Regionalism, the soaring number of investor-state disputes has shaped the NREO and the stance of the Global South. Since the 2000s, reported ISDS cases have increased fivefold, and the number of Asia-Pacific states as respondents doubled the number as claimants.<sup>193</sup> ISDS provisions became the source of global protectionism and underpin public criticism against FTAs. ISDS is perceived to be undemocratic for permitting foreign corporations to bypass domestic courts’ jurisdiction. It is also criticized for creating a “regulatory chill” that makes public policy measures vulnerable to foreign investors’ legal challenges.

COMP. L. 1, 4-5 (2011); Amokura Kawharu & Luck Nottage, *Models for Investment Treaties in the Asian Region: An Underview*, Legal Studies Research Paper, No. 16/87 (2016), at 33-34.

<sup>191</sup> *Yaung Chi Oo Trading Pte Ltd. v. Government of the Union of Myanmar*, 42 I.L.M. 404 (2003).

<sup>192</sup> *Id.* paras. 4-8 & 76-86. The dispute involves the interpretations of pre-ACIA investment agreement, the 1987 Agreement for the Promotion and Protection of Investments (IGA) and the 1998 Framework Agreement on the ASEAN Investment Area (AIA).

<sup>193</sup> As of January 2017, there are 767 publicly known investor-state cases. Investor-State Dispute Settlement: Review of Developments in 2016 (2017) [ISDS Review], at 2; Trends and Development in Provisions and Outcomes of RTA/FTAs Implemented in 2015 by APEC Economies (2016), at 30.

The case of *Philip Morris v. Australia* changed the landscape and resulted in the tobacco carve-out clause of the TPP's ISDS provisions.<sup>194</sup> In this case, Philip Morris challenged Australia's plain cigarette packaging legislation that intends to reduce smoking.<sup>195</sup> Although the Virginia-based company was unable to resort to the Australia-US FTA that does not include ISDS, corporate restructuring entitled its Hong Kong subsidiary to sue Canberra under the Australia-Hong Kong BIT.<sup>196</sup> In the Tribunal's view, "this arbitration constitutes an abuse of rights" because the dispute was foreseeable to Phillip Morris at the time of the restructuring.<sup>197</sup> Despite the result, the case incurred public outcry and states' concerns about regulatory sovereignty and legal expenses. The direct response was the TPP's exclusion of tobacco control measures. This carve-out has also been adopted in the Australia-Singapore FTA and will likely influence the RCEP's ISDS design.<sup>198</sup>

In addition to Australia's position, a compromise of RCEP stake-holding countries is of significance to the investor-state arbitration mechanisms under South-based FTAs. India and Indonesia are most resistant to "pro-investor" ISDS. As the No. 1 ISDS target among RCEP countries, India has been the respondent in 21 disputes and the amount of compensation that investors claimed reached \$12.3 billion.<sup>199</sup> For example, the Dobhol power plant project dispute led US-based Enron, General Electric and Bechtel to file nine cases against India under various BITs.<sup>200</sup>

Other than "losing control" over its energy policy, India lost the case of *White Industries*, in which an Australian company challenged the delays of the Indian judicial system.<sup>201</sup> Based on the Australia-India BIT's MFN clause, the Tribunal held that New Delhi breached the obligation under its BIT with Kuwait to

Voon, *Consolidating International Investment Law: The Mega-Regionals as a Pathway Towards Multilateral Rules*, [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=2929145](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2929145) (last visited Aug. 10, 2017), at 25 (stating that the amendment was "modelled on the TPP provision").

<sup>199</sup> ISDS Review, *supra* note 193, at 52; see also Cecilia Olivet et. al., *The Hidden Costs of RCEP and Corporate Trade Deals in Asia* (2016), at 3-6 ("India alone has been the target of 40% of the cases filed against RCEP countries.").

<sup>200</sup> Olivet et. al., *supra* note 199, at 9-10.

<sup>201</sup> Final Award, *White Industries Australia Limited v. India*, UNCITRAL (2011), para. 16.1.1.

ensure an “effective means of asserting claims and enforcing rights.”<sup>202</sup> These incidences led India to redraft the Model BIT that significantly limits the access to ISDS by imposing the exhaustion of local remedies as the condition.<sup>203</sup> For similar policy reasons, Indonesia has terminated 17 BITs since the government unilaterally abrogated its BIT with the Netherlands in 2014.<sup>204</sup> In other words, the ACIA, ASEAN+1 FTAs and the RCEP will be the primary avenues by which foreign investors can utilize ISDS against Jakarta.

Contrary to India and Indonesia, Korea and Japan are at the forefront of ISDS proposals in RCEP negotiations.<sup>205</sup> Their position to “TPP-nize” RCEP ISDS provisions is to ensure that their significant investments in India and Southeast Asia are guaranteed. Notably, China’s evolving position on ISDS stands unique in the Global South. While Beijing’s “Westphalian fundamentalist” doctrine continues to apply to territorial disputes in arbitration, it has revamped the ISDS strategy in tandem with the increasingly active use of WTO disputes.<sup>206</sup> For Beijing, investment arbitration benefits the OBOR initiative by protecting outbound Chinese FDIs and can hardly undermine the communist leadership. China’s earlier BITs echo its 1993 reservation to the ICSID Convention that confines the jurisdiction of a tribunal to “compensation resulting from expropriation and nationalization.”<sup>207</sup> Nonetheless, the Australia-China FTA remarkably expanded the ISDS application to cover violations of national treatment obligations.<sup>208</sup> Although Beijing has yet to push for ISDS provisions vigorously, its changing practice will be critical to the RCEP.

<sup>208</sup> In comparison, ISDS provisions do not apply to MFN treatment. Free Trade Agreement between the Government of Australia and the Government of the People’s Republic of China (2015) [Australia-China FTA], arts. 9.3 & 9.4. China’s BITs in the late 1990s reflect the same trend to widen the scope of ISDS. Vivienne Bath, “One Belt, One Road” and Chinese Investment, *in* Legal Dimensions of China’s Belt and Road Initiative 165, 177 (Lutz-Christian Wolff & Chao Xi eds. 2016).

The US model of ISDS provisions has been the model for ASEAN FTAs. It was contended that the European model may shape the RCEP structure.<sup>209</sup> This contention is problematic. The EU's proposal for creating a multilateral investment court through the appellate mechanism in bilateral FTAs has raised concerns about its practicability and implications for developing countries.<sup>210</sup> Given that the ICSID annulment proceedings are confined to limited grounds, the appellate system aims to increase the partiality, transparency and predictability of ISDS awards.<sup>211</sup> Similar to the TPP, the EU-Singapore FTA merely includes references to a potential appellate mechanism.<sup>212</sup> Washington's unclear stance that has halted negotiations of the TTIP makes its "Appeal Tribunal" provisions futile.<sup>213</sup> By far, the EU only succeeded in incorporating its proposal in the FTAs with Canada and Vietnam.<sup>214</sup>

The new EU trade policy is to evaluate the resumption of FTA negotiations with Thailand and Malaysia and eventually conclude the ASEAN-EU FTA.<sup>215</sup> The RCEP negotiators should be advised that almost 70% of ISDS cases against their countries were filed by European investors.<sup>216</sup> The potential result that the EU could merely persuade less developed RCEP countries to accept the appellate mechanism suggests the neocolonial relationship, which trade dependency theorists envisioned. More fundamentally, the legal dispute that substantially delayed the ratification of the EU-Singapore FTA has implications for ASEAN and the RCEP. The Court of Justice of the European Union case concerned whether the EU was entitled to have exclusive competence to include ISDS provisions in the FTA and the Court ruled against the EU Commission.<sup>217</sup> In the Court's view, the ISDS regime will remove disputes from domestic courts'

jurisdiction and hence requires the consent of member states under the shared competence of EU law.<sup>218</sup> This decision would impose legal obstacles on the EU's Asian FTAs and limit the impact of the ISDS proposal on the RCEP.

#### **IV. The Systemic Impact on Regional and Multilateral Trading Systems**

This article sheds light on the theoretical underpinning of the NREO, which explains the legal strategies of ASEAN, China and India to pursue the RCEP. The discussion of the core elements of the RCEP buttresses the corollaries of the new dependency theory that the assertive legalism of the Global South can change its economic and development trajectory. The RCEP will invigorate paradigm changes in Asian FTAs and constitute a normative foundation for the Global South in world trade law.

The implementation of the AEC and ASEAN+1 FTAs provide the joint impetus for the goals of the AEC Blueprint 2025 and the RCEP. From a global perspective, the mega-regional alliance will further influence the trading systems and international economic law. The critical and systemic issues in Third Regionalism include normative conflicts of trade fragmentation. Jurisdictional clashes under overlapping agreements inevitably require scrutiny of WTO and VCLT case law. Equally critical matters involve the RCEP's nexus with the APEC-based FTAAP after the US withdrawal from the TPP, as well as the RCEP's pro-development operative mechanism.

##### **A. Normative Conflicts of Trade Fragmentation**

The 16-country RCEP will face new dynamics of trade fragmentation in international economic law, as the mega-FTA could further complicate the Noodle Bowl syndrome due to overlapping FTAs and BITs. Nevertheless, the RCEP's consolidation of intra-RCEP trade and investment pacts could immensely benefit developing nations and the Doha Round. Three types of normative conflicts amid fragmented trade rules have emerged in Third Regionalism and complicated the application of WTO law and the Vienna Convention on the Law of Treaties.

First, the conventional phenomenon arises from the jurisdictional clashes between the WTO and FTAs. In *Mexico – Soft Drinks*, Mexico's defense relied on the NAFTA's forum exclusion clause when the United

---

<sup>218</sup> *Id.* paras. 288-293.

States brought a WTO complaint against Mexico's tax measures.<sup>219</sup> Mexico argued that because the case constituted part of "a broader dispute" it had previously brought against Washington in NAFTA proceedings, the forum exclusion clause required the NAFTA to be the sole forum for the case.<sup>220</sup> The Appellate Body held that a panel's declining its own jurisdiction would "diminish" a complaining party's right under the Dispute Settlement Understanding (DSU).<sup>221</sup> The Appellate Body further elaborated that although "legal impediments" may exclude the WTO's jurisdiction, such impediments did not exist in the present case.<sup>222</sup>

In a more recent case, *Peru – Agricultural Products*, Guatemala challenged the consistency of Peru's Price Range System with the Agreement on Agriculture and the GATT.<sup>223</sup> Peru contended that Guatemala violated "good faith" obligations under the DSU, as Guatemala waived the right to bring the WTO complaint under their bilateral FTA.<sup>224</sup> After scrutinizing paragraph 9 of Annex 2.3 of the FTA, the Appellate Body ruled that a waiver to relinquish DSU rights "must be made clearly" and "cannot be lightly assumed."<sup>225</sup> In other words, such provisions do not constitute the "legal impediments" that the Appellate Body explained in *Mexico – Soft Drinks*.<sup>226</sup> Thus, based on WTO jurisprudence, even if the RCEP does not incorporate the "supremacy clause" that prioritizes the WTO Agreement, a forum exclusion clause can hardly be interpreted to bar the WTO's jurisdiction.<sup>227</sup>

Second, emerging FTA-FTA conflicts have arisen in tandem with proliferating trade pacts in Third Regionalism. FTAs with overlapping geographical scopes led to more complex issues than the noodle bowl syndrome due to divergent ROOs. For example, other than the WTO, Singapore could bring an identical

<sup>224</sup> Peru's argument is based on Articles 3.7 and 3.10 of the Dispute Settlement Understanding. *Id.* para. 5.19.

<sup>225</sup> *Id.* para. 5.25.

<sup>226</sup> *See id.* ft. 106 ("[W]e do not consider that Members may relinquish their rights and obligations under the DSU beyond the settlement of specific disputes). For further discussion on similar cases and forum shopping issues, see generally Joost Pauwelyn & Luiz Eduardo Salles, *Forum Shopping Before International Tribunals: (Real) Concerns, (Im)Possible Solutions*, 42:1 CORNELL INT'L L. J. 77 (2009).

<sup>227</sup> *See* Agreement on Comprehensive Economic Partnership among Member States of the Association of Southeast Asian Nations and Japan (2008) [AJFTA], art. 10.3. ("[T]he WTO Agreement shall prevail to the extent of the inconsistency.")

complaint against China under the bilateral FTA, the ASEAN-China FTA and the RCEP. Forum shopping is a legal challenge. In practice, *de jure* consolidation that enables a wider FTA to terminate intra-FTAs is an ideal yet a politically sensitive exercise. A rare example is the Commonwealth of Independent States Free Trade Area that declared six bilateral FTAs “null and void” in 2012.<sup>228</sup> During TPP negotiations, Australia, New Zealand and Singapore argued for the “clean slate” approach to supersede intra-TPP pacts.<sup>229</sup> On the contrary, the United States vigorously opposed the proposal in order to keep its existing market access commitments under bilateral FTAs, such as FTAs with Australia and Korea.<sup>230</sup> The end result is the TPP provision that merely allows the FTA “to coexist with” other agreements.<sup>231</sup>

A cursory overview of the Guiding Principles for the RCEP suggests the same coexistence approach to ASEAN+1 FTAs.<sup>232</sup> Nevertheless, the diversity of treaty language reveals more intricate interpretations than the TPP. In their “relations to other agreements” provisions, the AANZFTA and the ASEAN-Japan FTA follow the three-phase approach that intra-RCEP bilateral FTAs adopted.<sup>233</sup> Substantively, “[e]ach party reaffirms its rights and obligations under” existing agreements to which they are parties.<sup>234</sup> The ASEAN+1 FTA should not “be construed to derogate from” existing obligations arising from other agreements.<sup>235</sup> Procedurally, a party “shall immediately consult with” another party should inconsistency between ASEAN+1 FTAs and other agreements materialize.<sup>236</sup>

The ASEAN-Japan FTA endorses parallelism of FTAs by stressing the validity of a separate agreement between parties if it provides more favorable treatment.<sup>237</sup> The “more favorable” assessment can be quantitatively determined if a single-issue dispute involves tariffs or a particular mode of services trade.

<sup>228</sup> Notification by the Russian Federation, WT/REG/GEN/N/8, Apr. 1, 2016, at 1-2; Asia-Pacific Trade and Investment Report (2016), at 101.

<sup>229</sup> Deborah K. Elms & C.L. Lim, *An Overview and Snapshot of the TPP Negotiations*, in *THE TRANS-PACIFIC PARTNERSHIP: A QUEST FOR A TWENTY-FIRST CENTURY TRADE AGREEMENT* 21, 37 (Deborah Elms et. al. eds. 2012).

<sup>230</sup> *Id.*

<sup>231</sup> TPP, art. 1.2.1; *see id.* (stating that in 2010, the parties to the TPP “essentially decided not to decide.”).

<sup>232</sup> *See* Guiding Principles, *supra* note 44, principle 5 (stipulating that ASEAN+1 FTAs and intra-RCEP FTAs “will continue to exist”).

<sup>233</sup> *E.g.*, AANZFTA, ch. 18., art. 2.1-2.3; AJFTA, art. 10.1-2 & 4; Australia-China FTA, art. 1.2.1-3.

<sup>234</sup> *E.g.*, AANZFTA, ch. 18., art. 2.1.1

<sup>235</sup> *Id.* ch. 18., art. 2.1.2.

<sup>236</sup> *Id.* ch. 18., art. 2.1.3

<sup>237</sup> AJFTA, art. 10.2.

However, multi-issue cases can complicate the qualitative application of the “more favorable” proviso.<sup>238</sup> The Korea-Vietnam FTA that identifies “more favorable treatment of goods, services, investment, or persons” is an attempt to provide higher certainty and could be a basis for the RCEP to detail the conditions.<sup>239</sup>

Certain intra-RCEP FTAs, evidenced by the ASEAN-Japan FTA and the China-New Zealand FTA, encompass the interpretative role of “international law” in resolving treaty inconsistencies.<sup>240</sup> Article 30 of the VCLT provides the authoritative guide on “successive treaties relating to the same subject-matter.”<sup>241</sup> The overlapping rights and obligations under the RCEP, ASEAN+1 FTAs and bilateral FTAs fall within the ambit of Article 30. Presumably, the *les posterior* rule codified in Article 30.3 applies to ASEAN+1 FTAs’ three-phase approach, under which “the earlier treaty applies only to the extent that” it is “compatible with” the subsequent treaty.<sup>242</sup> Nevertheless, a *lex specialis* argument may exclude the application of Article 30.3 because the FTAs’ three-phase provisions can be interpreted as a special law that prevails over the general VCLT rule.<sup>243</sup> Even if the argument fails, applying the later-in-time rule under Article 30.3 would encounter obstacles akin to those raised under the “more favorable” provisions because of the “compatibility” assessment in multi-issue claims.

Finally, modern FTAs that incorporate investment chapters may conflict with coexistent BITs in investment-related disputes. In the overlapping FTA-BIT context, the application of the VCLT involves different jurisdictional disputes. ISDS mechanisms in FTAs and BITs with inconsistent scopes and carve-

<sup>240</sup> AJFTA, art. 10.4; Free Trade Agreement between the Government of New Zealand and the Government of the People’s Republic of China (2008), art. 3.2.

<sup>241</sup> Vienna Convention on the Law of Treaties (1969) [VCLT], art. 30.3. Article 30.2 is inapplicable, as almost none of these agreements include “it is subject to” provisions.

<sup>242</sup> Article of 30.3 of the VCLT reflects the later-in-time rule. See also Alexander Orakhelashvili, *Article 30 of the 1969 Vienna Convention on the Law of Treaties: Application of the Successive Treaties Relating to the Same Subject-Matter*, 31:2 ICSID REV. 344, 361 (2016) (“[T]o what extent the *lex posterior* rule stated in Article 30 VCLT would be applied in arbitral practice is not certain . . .”).

<sup>243</sup> This argument, which was raised in the context of the co-existence of the Australia-China FTA and BIT, also applies to the FTA-FTA conflicts. See Tania Voon & Elizabeth Sheargold, *Australia, China, and the Co-existence of Successive International Investment Agreements*, at 13, [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=2905516](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2905516) (last visited Aug. 28, 2017) (discussing the Article 1.2.2 of the China-Australia FTA).

outs make the operation of Article 30.3 difficult.<sup>244</sup> *Yaung Chi Oo v. Myanmar*, which concerned 1987 and 1998 intra-ASEAN investment agreements, exemplified ASEAN jurisprudence on successive treaties.<sup>245</sup> In the Tribunal's view, the two agreements in dispute had different scopes of investment and ASEAN states had no intention to merge them.<sup>246</sup> Article 12 of the 1998 agreement stipulates that it "shall prevail" if it "provides for better and enhanced provisions."<sup>247</sup> According to "the general practice of ASEAN with respect to successive agreements," the Tribunal held that Article 12 should not be interpreted to amend the 1987 agreement because the two pacts "are clearly intended to operate separately."<sup>248</sup> This decision similarly buttresses the difficulty in applying Article 30.3 of the VCLT in practice.

RCEP negotiators should be aware that similar to FTA-FTA scenarios, *de jure* consolidation that solves FTA-BIT conflict is scarcely used. Article 9.10 of the EU-Singapore FTA, which will terminate 12 BITs between EU states and Singapore, illustrates this approach.<sup>249</sup> The China-Singapore FTA (CSFTA) utilizes a different type of *de jure* consolidation, which incorporates a wider-FTA's investment obligations.<sup>250</sup> Without its own investment provisions, the CSFTA makes the ASEAN-China Investment Agreement under the ASEAN-China FTA "an integral part of" the CSFTA.<sup>251</sup>

Because only the Investment Agreement provides the ISDS mechanism, no jurisdiction conflict exists in relation to the CSFTA. Yet, legal issues may relate to the China-Singapore BIT, which continues to be effective parallel with the CSFTA. The 1985 BIT limits ISDS to "the amount of compensation" and confines the forum to "arbitral tribunals established by both parties."<sup>252</sup> A party may well resort to the

<sup>246</sup> *Id.* paras. 77 & 82.

<sup>247</sup> *Id.* para. 79.

<sup>248</sup> *Id.* paras. 80-82.

<sup>249</sup> EUSFTA, art. 9.10.1 & Annex 9-D.

<sup>250</sup> See Wolfgang Alschner, *Regionalism and Overlap in Investment Treaty Law: Towards Consolidation or Contradiction*, 17:2 J. INT'L ECO. L. 271, 282-84 (2014) (elaborating *de facto* consolidation). The author categorizes the China-Singapore FTA as an example of *de facto* consolidation. I hold a different view. Any formal legal approach to enabling one of the two or more co-existing agreements to govern the relations between the parties should constitute *de jure* consolidation. An approach that achieves the same result but without a legal mechanism is *de facto* consolidation.

<sup>251</sup> Free Trade Agreement between the Government of the People's Republic of China and the Government of the Republic of Singapore (2008) [CSFTA], art. 84.1.

<sup>252</sup> China and Singapore Agreement on the Promotion and Protection of Investment (1985), art. 13.3. In comparison, Article 14 of the ASEAN-China Investment Agreement has more detailed provisions on investment disputes. Article 112 of the CSFTA simply affirms parties' "existing rights and obligations" and does not stipulate the application of the FTA and the BIT.

CSFTA for additional procedural guarantees. In this regard, more detailed provisions under the CSFTA facilitate *de facto* FTA-BIT consolidation. This approach could enable the RCEP to minimize normative conflicts of trade fragmentation.

## B. The RCEP as the Pathway to the FTAAP

The unsettled path of the TPP and the TTIP amid populist isolationism made the RCEP's status unique. Reinforcing the NREO argument requires an understanding of the RCEP as the pathway to the APEC-envisioned FTAAP in Third Regionalism. This analysis not only fills the much-needed gap in the existing literature, but also benefits the revitalization of the Doha Round. Currently, APEC includes 12 parties to the RCEP, which facilitates APEC's Bogor Goals to accomplish Asia-Pacific trade and investment liberalization by 2020.<sup>253</sup> APEC's nature as a soft-law institution is distinct from FTAs that impose hard-law obligations. To minimize the "sovereign costs," APEC's operating basis neither involves the treaty-ratification process nor incurs trade retaliation due to a violation of the *pacta sunt servanda* rule.<sup>254</sup> The voluntary foundation helped bypass trade politics of regionalism, but resulted in APEC's institutional weaknesses that marginalized its role.

In 2004, the APEC Business Advisory Council propounded the 21-party FTAAP in order to reinvigorate APEC in light of proliferating FTAs.<sup>255</sup> After APEC adopted the FTAAP vision in 2006, the 2010 APEC Leaders' Declaration identified "ASEAN+3, ASEAN+6, and the Trans-Pacific Partnership" as pathways to the comprehensive trade pact.<sup>256</sup> Optimism about the TPP echoed the Obama administration's engagement in P-4 agreement-based TPP negotiations in late 2009.<sup>257</sup> Notably, the "ASEAN plus" frameworks that "codified" China and Japan's EAFTA and CEPEA proposals were distinct from the RCEP, which underpins ASEAN centrality.

<sup>255</sup> APEC News Release, Asia Pacific Business Leaders to Press APEC Leaders to Accelerate Regional Economic Integration, Feb. 14, 2014, at 1.

<sup>256</sup> *Id.*; 2010 Leaders' Declaration, Nov. 13, 2010.

<sup>257</sup> The predecessor to the TPP is the P-4 (Pacific 4) agreement, which was concluded between Singapore, New Zealand, Chile and Brunei in 2006. Fergusson & Williams, *supra* note 33, at 1.

To enrich the existing literature that only focuses on the TPP-FTAAP nexus, I offer an analysis on the RCEP as a more feasible pathway to the FTAAP. The RCEP first appeared in the Annex on the 2014 Beijing Roadmap, in which APEC declared that “the possible pathways to the FTAAP” encompass the TPP and the RCEP.<sup>258</sup> The US-China rivalry led to the delicate language. Beijing argued vigorously for the FTAAP when it hosted the APEC meetings.<sup>259</sup> Washington opposed the proposal due to the concern about detracting the TPP and impairing the “pivot to Asia” strategy.<sup>260</sup> The compromise was to pursue APEC’s two-year Collective Strategic Study to revitalize the FTAAP under the auspices of China.<sup>261</sup> Markedly, APEC urged “the early completion of” RCEP negotiations in 2015.<sup>262</sup> In the following year, APEC leaders endorsed the FTAAP Study that stresses the RCEP’s substantial impact on “the economic landscape of the region and the global economy.”<sup>263</sup> Thus, APEC has placed the RCEP on par with the TPP as the integral part of the FTAAP roadmap, which could rejuvenate the stalled Doha Round negotiations.

The US withdrawal from the TPP diverted the status of the TPP vis-à-vis the RCEP. Article 30.5 of the TPP conditions its entry into force on the approval of countries that account for 85% of the combined GDP “of the original signatories,” thus making US membership indispensable.<sup>264</sup> The revision to this provision is a procedural hurdle for the remaining 11 TPP countries to overcome under the CPTPP. Substantively, it is contentious whether countries could retain the scope of concessions without having market access to the United States. For instance, the CPTPP’s list of suspended provisions evidence Canada’s cultural exception request and Vietnam’s concerns about its IP and labor rights commitments.<sup>265</sup>

<sup>261</sup> See 2014 Leaders Declaration, Nov. 11, 2014 (“We agree to launch a collective strategic study on . . . the FTAAP, and instruct officials to undertake the study, consult stakeholders and report the result by the end of 2016”).

<sup>262</sup> 2015 Leaders’ Declaration, Nov. 19, 2015.

<sup>263</sup> See 2016 Leaders’ Declaration, Nov. 20, 2016 (“[W]e endorse the Recommendations of the Study as the Lima Declaration on FTAAP”). In comparison, in the assessment of the TPP, the Study merely states the TPP’s signature and entry into force issues without “praising” its potential effect. Collective Strategic Study on Issues Related to the Realization of the FTAAP (2016), at 166 & 170.

<sup>264</sup> TPP, art. 30.5.2. US GDP alone constitutes 65.2% of the combined GDP of original TPP 12 countries. Marina Tsiaras et. al., *supra* note 3, at 14.

<sup>265</sup> Annex II – List of Suspended Provisions, TPP Statement, *supra* note 9; *Vietnam Proposes Amendments to Stalled TPP Trade Deal at Sydney Talks: Sources*, Aug. 29, 2017, <http://bilaterals.org/?vietnam-proposes-amendments-to&lang=en>.

With Australia's and Mexico's support, Japan became the driving force for the CPTPP.<sup>266</sup> Nonetheless, the fact that only Japan and New Zealand ratified the TPP and the remaining items to be finalized under the CPTPP may still cast doubt on the eventual entry into force of the agreement.<sup>267</sup>

While the evolution of the TPP illustrates the structural North-South divide, the relative development of the RCEP strengthens the theoretical and substantive arguments for the NREO in Third Regionalism. From the new dependency theory perspective, the RCEP reaffirms the assertive legalism of developing nations by enabling new generation South-South FTAs to alter the subordinate relationship with the North. The *realpolitik* of international economic law elevated the RCEP from being considered a Plan B for global regionalism to the only “on track” mega-regional agreement that could considerably impact the multilateral trading system.

Markedly, the accession to the TPP is restricted to “any State or separate customs territory,” which is an APEC member “as the Parties may agree.”<sup>268</sup> In comparison, the RCEP's open accession clause, which allows “any ASEAN FTA partner” or “any other external economic partners,” could result in a greater impact beyond the FTAAP.<sup>269</sup> Pursuant to the AEC Blueprint 2025, the new ASEAN-Hong Kong FTA constitutes a new ASEAN+1 FTA and will pave the way for the Special Administrative Region of China to join the RCEP.<sup>270</sup> Furthermore, the 2016 ASEAN-Pacific Alliance Framework for Cooperation that expedites integration between the AEC and Latin America reinforces South-based cooperation.<sup>271</sup> The

potential coverage of additional APEC and TPP members, such as Chile and Peru, can be the building block for the FTAAP and transform the RCEP as the new trans-Pacific architecture.<sup>272</sup>

### C. The Pro-Development Operative Mechanism

The RCEP stands unique among mega-regionals because of its South-based origin and pro-development policy. A functional operative mechanism is essential to construct the RCEP as the normative foundation for the Global South. In line with ASEAN's commitments to the Doha Development Agenda and the UN Sustainable Development Goals, the RCEP will incorporate "appropriate forms of flexibility, including" SDT provisions and "additional flexibility" accorded to LDCs.<sup>273</sup> The flexible mechanism is at the core of the legal framework of South-South FTAs, but its opaque interpretations run the risk of nullifying the RCEP's effectiveness. The APEC principle of flexibility highlights the soft-law regime that empowers members to choose their liberalization timeframes and exclude sensitive sectors from liberalization.<sup>274</sup> The intertwined non-discrimination principle, commonly referred to as "open regionalism," often incurs free-riding concern about extending liberalization to non-members.<sup>275</sup>

The APEC practice should not be confused with ASEAN's hard-law notion of flexibility, which the RCEP will follow.<sup>276</sup> The "ASEAN Minus" formula that crystalized SDT provisions allows for flexible participation and avoids the lowest common denominator dilemma under conventional South-South FTAs.<sup>277</sup> Subject to the Grand Bargain, ASEAN+1 FTAs include lengthier yet clearly stipulated liberation

<sup>276</sup> Guiding Principles, *supra* note 44, principle 4 (stipulating that the norm of flexibility will be "consistent with the existing ASEAN+1 FTAs, as applicable").

<sup>277</sup> Transcript of Reply by Minister for Foreign Affairs George Yeo to Questions in Parliament, Sept. 17, 2007, para. 6.

timeframes for CLMV countries.<sup>278</sup> Entry into force provisions of ASEAN+1 FTAs similarly adopted this formula.<sup>279</sup>

The RCEP should further take into account ASEAN's internal practice. Article 21 of the ASEAN Charter codified the ASEAN Minus modality and confined it to "the implementation of economic commitments" that all ASEAN states decided by consensus.<sup>280</sup> As the AEC's services liberalization evidences, two or more members could liberalize selected sectors and permit the subsequent participation of other nations.<sup>281</sup> Unlike APEC, the concessions are only conferred on a reciprocal basis in order to eliminate the free rider problem. Arguably, the ASEAN Minus X formula could result in fragmented commitments at divergent speeds. A legal loophole may exist when a state first agrees to its commitments, but then decides to opt out of such commitments after finding the implementation difficult.<sup>282</sup> Therefore, the RCEP's elaboration of ASEAN's flexibility rules will not only benefit the AEC, but also serves as a pro-development model for the South-based FTAs.

For the sustainability of the mega-regional pact, I propose that the ASEAN Secretariat provide institutional support for the RCEP.<sup>283</sup> The administrative design is often the last consideration of trade negotiators, but is critical to the FTA's enforcement, monitoring and dispute settlement proceedings. The TPP provisions to create the Committee on Development or the TPP Commission failed to consider the

The "ASEAN-X" modality, which is different from "Two Plus X," can be traced back to the Framework Agreement on Enhancing ASEAN Economic Cooperation (1992). SEVERINO, *supra* note 47, at 352-53; WOON, *supra* note 58, 158-59. See also Chan Sze Wei, *Decision-Making in the ASEAN Charter Process, in 50 YEARS OF ASEAN AND SINGAPORE* 235, 244 (Tommy Koh et. al. eds. 2017) ("AMM instructed HLTF that ASEAN-X should be limited to the implementation of economic agreements.")

<sup>281</sup> Based on the Protocol to Amend the ASEAN Framework Agreement on Services (2003), Article IV bis (ASEAN Minus X modality) was added to the AFAS.

<sup>282</sup> SEVERINO, *supra* note 47, at 352-53; Nikomborirak & Jitdumrong, *supra* note 53, at 59.

<sup>283</sup> Under the \$20 million budget, the ASEAN Secretariat currently has 300 staff members recruited from Indonesia and other ASEAN states. Termsak Chalermphanupap, *No Brexit Repeat in ASEAN*, DIPLOMAT, <http://thediplomat.com/2016/06/no-brexite-repeat-in-asean/>.

practical significance of an impartial, permanent secretariat.<sup>284</sup> It may be suggested that as the RCEP functions as the pathway to the FTAAP, the institutional mechanism should be based on the APEC Secretariat. This position does not stand. Contrary to APEC's assertion to be "an incubator of issues related to the FTAAP by providing leadership," APEC's role is limited to facilitating RCEP or TPP discussions on the sidelines of APEC meetings.<sup>285</sup> The FTAAP will only "be realized outside of APEC" because APEC's soft-law mechanism remains unaffected.<sup>286</sup> In addition, the absence of treaty-based legal personality resulted in APEC's *sui generis* status. As only Singapore law conferred the 60-staff APEC Secretariat "the legal capacities of a body corporate," privileges and immunities cannot be asserted in foreign proceedings.<sup>287</sup>

Distinctively, the legal standing of ASEAN under the ASEAN Charter is reinforced by the conclusion of the ten-country agreement on privileges and immunities.<sup>288</sup> The agreement, along with the detailed pact concluded between Indonesia and the ASEAN Secretariat, further extends functional benefits to "experts on missions for ASEAN" and "permanent missions" of foreign nations.<sup>289</sup> The RCEP's *mutatis mutandis* application in such rules could increase the structural efficiency of the mega-regional agreement. Moreover, for development purposes, the institutional memory of the ASEAN Secretariat in enforcing the Initiative for ASEAN Integration (IAI) that assists CLMV countries is indispensable.<sup>290</sup> The RCEP could consolidate the funding basis and enhance the capacity-building of the Secretariat. The streamlining of the IAI with parallel ASEAN+6 technical assistance projects will collectively narrow the development gap and augment the pro-development effect for the Global South.

## V. Conclusion

Emerging populist isolationism has diverted the path of the neoliberal international economic order and cast doubt on the TPP and other trade agreements. By assessing the RCEP's evolution as Asia's new trade architecture, this article provided the most up-to-date examination of the implications of the 16-country mega-FTA for Asian regionalism and the Doha Round. By making interrelated theoretical and substantive claims, the article moved the conventional FTA discourse to a new dimension on the assertive legalism of developing nations. It responded to the inquiry of the emerging NREO based on new-generation South-South FTAs in the post-TPP era.

The article argued that the RCEP will galvanize the paradigm change in Third Regionalism and provide a normative foundation for the Global South in international economic law. Achieving *de jure* and *de facto* integration mandates that the RCEP commitments exceed not only ASEAN+1 FTAs, but also the AEC under the AEC Blueprint 2025. To reinforce the new dependency theory, this research explored RCEP negotiations vis-à-vis the legal and policy strategies of ASEAN, China and India. Based on ASEAN practice, it reveals multifaceted challenges to tariff eliminations, the noodle bowl syndrome, and the liberalization of services, such as professional mobility. The contentious ISDS cases involving ASEAN states and the EU's Asian FTAs were also critically evaluated.

From a global perspective, the article explained the RCEP's systemic impact on world trade law. Under the WTO and VCLT jurisprudence, it analyzed the new dynamics of trade fragmentation owing to FTA and BIT jurisdictional conflicts that involve FTAs and BITs. Constructing the RCEP as the pathway to the APEC-based FTAAP is imperative to reinvigorate the Doha Round. The pro-development principle of flexibility and the institutional mechanism further buttress the RCEP's indispensable position in Asian regionalism and the multilateral trading system.
