

**LIST OF CONCRETE DELIVERABLES FOR ASEAN-INDO-PACIFIC FORUM:
IMPLEMENTATION OF THE ASEAN OUTLOOK ON THE INDO-PACIFIC**

A. Subtheme I: Green Infrastructure and Resilient Supply Chain

No	Activity	Proponent States	Partner States	Project Description
1	A Large-Scale Waste to Energy Project in Viet Nam	Viet Nam	Japan	JFE Engineering Corporation and Thuan Thanh Environment Joint Stock Company to jointly establish T&J Green Energy Company Limited start a Waste to Energy business in Bac Ninh Province, Viet Nam.
2	Accelerating Implementation in the Agriculture Value Chain in Oriental Mindoro	The Philippines	Republic of Korea	The project is part of Climate Resilient and Inclusive Green Growth for Poor Rural Communities between Global Green Growth Institute (GGGI) and Korea International Cooperation Agency Philippines - KOICA. Project will include design, financing, and operationalization of micro-enterprises and a Provincial Agricultural Center (PAC) in Oriental Mindoro.
3	Added Flight Route HCMC - Jakarta	Indonesia	Viet Nam	Vietjet will increase the number of Indonesia-Viet Nam flights. Every week, flights will increase from 70 flights to 84 flights.
4	Advanced Metering Infrastructure (“AMI”)	Indonesia	People's Republic of China	The project is mainly about designing, procurement, construction, commissioning, operation, and maintenance of an Advance Metering Infrastructure System located in various locations across Indonesia.
5	Airport Construction	Timor Leste	Indonesia, Japan	The development of President Nicolau Lobato airport to be more modern through the PPP scheme. The PPP process is currently in the pre-procurement stage. Funding for phase 1 development has been completed. Phase I construction work will begin in 2024 with a final completion target of 2027.
6	APRI Geothermal Energy Project	The Philippines	People's Republic of China	CGIF has backed APRI, a new energy company of energy industry group Aboitiz Equity Ventures, to support the development of the company's geothermal projects.
7	Australia-Asia PowerLink (AAPowerLink)	Indonesia	Australia	AAPowerLink is a greenfield project that will supply renewable energy electricity from Australia to Asia.
8	Bac Ai Pump Storage Project – contributing to the Viet Nam JETP	Viet Nam	European Union	The Bac Ai electricity project is a under construction hydropower plant in Viet Nam to assist stabilizing national power system and provide energy meet peak demand, without greenhouse gas emissions.

No	Activity	Proponent States	Partner States	Project Description
9	Bakheng 3 Project.	Cambodia	France	Expansion of the Bakheng Water Treatment Plant in Phnom Penh with an additional capacity of 195,000 m ³ /day. The capacity will be increased to 1,000,000 m ³ /day by 2023.
10	Bandung Integrated Public Transport Corridor (Bus stops and their vicinity, sidewalk, paratransit)	Indonesia	United Kingdom	The UK Global Future Cities Programme in Bandung City recommended five pilot corridors in the city to improved and developed to demonstrate integrated public transport system.
11	Batang Lupar Bridge	Malaysia	People's Republic of China	Batang Lupar Bridge (Samarahan-Betong) part of the Coastal Road Network Connectivity Programme in Sarawak, Malaysia. The project main work components generally consisted of the construction of a two-lane single carriageway.
12	British Petroleum's LNG development project	Indonesia	United Kingdom	The project involves the development of Ubadari Field LNG and Vorwata Enhanced Gas Recovery (EGR). The project encompasses a CCUS (Carbon Capture, Utilization, and Storage) program that will place Tangguh as one of LNG projects.
13	Carbon storage in former oil and gas mining sites	Indonesia	Australia	David Lim, the CEO of Carbon Aceh, to update the plan for the development of the carbon capture and storage (CCS) facility at the Arun Gas Field in Aceh.
14	Cold storage facility	Cambodia	Australia	The project will establish a cold storage facility, contributing to the development of a cold chain ecosystem in Cambodia. Phase 1 of project is a cross-docking facility located adjacent to the Phnom Penh Port.
15	Construction of copper and gold smelter in Gresik	Indonesia	United States	Freeport through PT Freeport Indonesia is building a copper smelter factory in Manyar, Gresik, which will produce 550,000 tons of cathode copper per year. The construction progress of the smelter is targeted to be completed by the end of 2023
16	Construction of Jakarta MRT South North Line	Indonesia	Japan	Indonesian government expanding public transportation system as one of countermeasures to ease traffic congestion and to reduce traffic pollution in Jakarta. JICA contributes to the expansion by providing Official Development Assistance (ODA) loan.
17	Construction of plastic and electronic waste recycling facilities. The end products as pellets and plastic ore for export.	Indonesia	People's Republic of China	Construction of plastic and electronic waste recycling facilities. Currently, there is a Memorandum of Understanding (MoU) between the Kendal Government and Alba Tridi.
18	Construction of railway bridges and elevated stations.	The Philippines	Indonesia	The construction of a 1.2 km long railway bridge and elevated station will be completed within 1460 days. Construction has been carried out for the North-South Commuter

No	Activity	Proponent States	Partner States	Project Description
				Railway by a consortium of PT PP and Adhi Karya.
19	Construction of silica water factory infrastructure for solar cells.	Indonesia	United States	Construction of silica water factory infrastructure for solar cells between PT Tynergy Technology Group and PT Wiraraja Tangguh took place during the Hannover Messe event in April 2023.
20	Davao City Bypass Construction Project	The Philippines	Japan	Bypass road construction connecting the southern tip and the center part of the City in Mindanao.
21	Development of an Environmentally Friendly Centre of Excellence	Indonesia	The Netherlands	PT ATMI IGI and Solinatra Group BV signed MoU for establishment of a CoE in Indonesia focuses on substituting use of single-use plastics with environmentally friendly materials in Solinatra's production with the options is Solo.
22	Development of Demonstration Farming and Regional Training Centre.	Fiji	Indonesia	Supporting the development of food security in areas prone to climate change and natural disasters such as Fiji. The building construction will be environmentally friendly, utilizing solar energy.
23	Direct Flight between Indonesia and India	Indonesia	India	The additional direct flight for the new New Delhi - Denpasar route will be operational on September 1, 2023. This will be other milestones to further develop tourism and people-to-people exchange between the 2 countries.
24	DKI Jakarta E-Bus Investment	Indonesia	United Kingdom	Large scale investment for PT TransJakarta buses including supporting infrastructure and facilities with goal of deploying around 10,000 buses by 2030.
25	Electricite du Cambodge (EDC) Project	Cambodia	France	Upgrading the transmission and distribution network of electricity and storage batteries to enhance the renewable energy grid in Cambodia. The signing of the credit agreement is scheduled for 2023.
26	Establishing Integrated Flood Management and Expanding Flood Forecasting and Warning System	Indonesia	Republic of Korea	Establishing Integrated Flood Management and Expanding Flood Forecasting and Warning System in Citarum River Basin
27	Expansion of phases 2 & 3 of the oleochemical project investment, Sumatra, Indonesia.	Indonesia	United Kingdom	The phases 2 & 3 expansion plan for Unilever's project in the Sei Mangkei Special Economic Zone involves oleochemical production.
28	Expansion of the MoU between ION Mobility, TVSM, PLN, and related Ministries	Indonesia	India, Singapore	ION Mobility has set up a 46,500-square-foot plant in East Karawang for battery units and electric two-wheelers (E2w) production.
29	Feasibility Studies of Indonesian Port (East Kalimantan and Batam)	Indonesia	Republic of Korea	The Feasibility Study is intended as an initial step in the construction of new ports in the East Kalimantan region (serving the IKN

No	Activity	Proponent States	Partner States	Project Description
				area) and Batam in order to improve connectivity. If the feasibility study shows positive results, it can be continued with port development cooperation.
30	Feasibility study and capacity building	Indonesia	United States	Feasibility studies for the construction of Small Modular Reactor Nuclear Power Plant in West Kalimantan to develop renewable energy in Indonesia.
31	Feasibility study and capacity building	Indonesia	United States	Grant Agreement for a feasibility study on the development of a 111-Megawatt (MW) wind power plant in West Sumbawa, West Nusa Tenggara, Indonesia.
32	Funding cooperation for Floating Solar Power Plant (PLTS) in Cirata, West Java.	Indonesia	United Kingdom	Floating Solar Power Plant project is under construction and expected to achieve Commercial Operation Date (COD) in 1Q 2024.
33	Hanwha HSC Project	Singapore, Malaysia	People's Republic of China	Hanwha HSC is involved in the manufacturing and retailing of chemical products, photovoltaic products, aerospace, and automotive advanced materials.
34	Hau Giang Project	Viet Nam	France	The project aims to support Hau Giang province in pursuing urban investments in Nga Bay city from a climate change resilience perspective. Loan agreement is expected to be signed in November 2023.
35	Ho Chi Minh City Urban Railway Construction Project	Viet Nam	Japan	This project aims to alleviate traffic congestion and air pollution in the Ho Chi Minh City metropolitan area by developing urban railroads and related facilities in Ho Chi Minh City, the largest city in Viet Nam.
36	Hoa Binh Project	Viet Nam	France	The Hoa Binh Hydropower Plant Expansion Project, with an additional capacity of 1920 MW.
37	Hospital Construction	Indonesia	Australia	The groundbreaking of the first Hospital (Depok) on June 20, 2023, by the Coordinating Minister for Economic Affairs, Minister of Health, and Director-General of Asia-Pacific and African Affairs of MOFA Indonesia.
38	Ialy Hydropower Plant Capacity Expansion Project	Viet Nam	France	Increasing the hydroelectric power plant capacity of Ialy by 50% (+360MW) and financing the Se San 4 solar power plant (49 MWp).
39	Indo Pacific Net Zero Battery Consortium (INBC), Sulawesi, Indonesia	Indonesia	United Kingdom	INBC to place Indonesia at heart of the global EV supply chain, to become an alternative for sustainable and low-carbon battery materials for G7 countries.
40	Indonesia EIPP (Economic Innovation Partnership Program) - Plan for financing the new capital city.	Indonesia	Republic of Korea	EIPP projects have been focusing on the development of infrastructure industries related to major infrastructure, manufacturing, capital relocation, and smart

No	Activity	Proponent States	Partner States	Project Description
				cities, some of which have yielded tangible outcomes.
41	Indonesia SuperPort TM	Indonesia	Singapore	The SuperPort TM aims to enhance connectivity among the ASEAN Grouping and promote smart and sustainable logistic infrastructure, aligning with the ASEAN Smart Logistic Network and, in turn, supporting the ASEAN MPAC.
42	Industrial Park Building	Indonesia	People's Republic of China	An MoU has been signed by Xinyi Group and the Indonesia Investment Coordinating Board (BKPM) for the processing of silica sand and quartz for solar panels.
43	Introduction of CNG-Diesel Hybrid Equipment to Public Bus in Semarang	Indonesia	Japan	Two cities conducted a survey in Semarang City through "Feasibility Study on JCM Project by City-to-City Collaboration."
44	Investment Grant Project for NR2 Road under the Lao Resilient Roads Framework Loan	Lao PDR	European Union	The project will support rehabilitation of National Road No. 2 (NR2) in Lao PDR, part of the ASEAN Road 13 (AH13), connecting Lao PDR to Viet Nam in the east (via NR2E) and Thailand in the west (via NR2W). The project is also part of the South-East Asia Regional Corridor and Connectivity – SEARECC project.
45	Lotus Wind Power Project	Viet Nam	Australia	Export Finance Australia (EFA) provided financing support to Power Construction Joint Stock Company No.1 (PCC1) and RENOVA, Inc. to build onshore wind farms in Viet Nam.
46	Low-Carbon Public Transport Projects in 4 cities	Indonesia	United Kingdom	WRI (World Resources Institute) is funded by UKPACT work with Makassar City Government to develop pilot designs where government can interventions to improve road transport resilience and accessibility.
47	MENTARI Program for Solar power and battery pilot project in Sumba and other energy transition projects in Sumba, Indonesia.	Indonesia	United Kingdom	Financial support for MENTARI program for three Renewable Energy projects with total hydro power generation capacity of 7 MW, through signing of loan and grant agreements with PT. Brantas Energi (a subsidiary of PT. Brantas Abhipraya) and PT. SMI.
48	Metro Rail Transit Line 3 Rehabilitation Project	The Philippines	Japan	The objective of the Project is to improve the safety and the service level of MRT Line 3 and to promote the use of it, by rehabilitating MRT Line 3.
49	Namtheun 2 (NT2) Floating Solar photovoltaic (PV) projects	Lao PDR	United Kingdom, Australia	The UK Government and Australia's Department of Foreign Affairs and Trade (DFAT) Partnerships for Infrastructure (P4I) are supporting Lao Holding State Enterprise (LHSE) in connection with Namtheun 2 (NT2) Floating Solar photovoltaic (PV) projects that is currently being designed by LHSE.
50	National Road No.5 Improvement Project	Cambodia	Japan	Objective of the project is to increase transportation capacity to improve the logistics efficiency along the National Road

No	Activity	Proponent States	Partner States	Project Description
				No.5 (Prek Kdam - Thlea Ma'am Section, Thlea Ma'Am-Battambang Section and Sri Sophorn-Poipet Section, and Battambang-Sri Sophorn Section).
51	Net-Zero Water Supply Infrastructure Project in the New Capital City of Nusantara, Indonesia	Indonesia	Republic of Korea	Constructing a solar powered water treatment plant with the capacity of 30,000m ³ /day in Nusantara, East Kalimantan Province, Indonesia.
52	North - South Commuter Railway Project	The Philippines	Japan	Developing the North - South Commuter Railway Project Malolos- Tutuban to increase the provincial connectivity.
53	North South Commuter Railway Extension Project	The Philippines	Japan	JICA financed the North-South Commuter Railway Extension in Metro Manila, The Philippines in collaboration with ADB.
54	Operational Readiness of Light Rail Transit (LRT) in Greater Jakarta (Jabodebek)	Indonesia	United Kingdom	The LRT Greater Jakarta readiness completion (Jabodebek) project, by Indonesian Ministry of Transport. The infrastructure development is carried out by Adhi Karya and maintenance by the National Railway Company (PT. KAI).
55	Paya Lebar Green	Singapore	Australia	Paya Lebar Green is a joint development by Certis and Lendlease, set to be a sustainable, adaptive, and technology-led workplace of the future that responds to the needs of Singapore's modern workforce.
56	Pre-IPO Stake Purchasing	Indonesia	United Arab Emirates	Indonesia Sovereign Wealth Fund (INA) and Masdar have jointly purchased 20% of Pertamina Geothermal Energy IPO shares (INA 5% and Masdar 15%) to further strengthen the renewable energy development.
57	Probolingo Bonded Warehouse Operation Project	Indonesia	Republic of Korea	Busan Port Authority (BPA) in collaboration with KIND and local logistics company PT Probolingo Logistics Center is building and operating a bonded warehouse (12,000m ²) at the Probolingo Port in East Java, Indonesia.
58	Promotion of Waste Separation at Source and Resource Circulation Project for Municipal Solid Waste in Long An Province, Viet Nam	Viet Nam	Republic of Korea	The projects will construct separation discharge and separation collection equipment and infrastructure, establishment and operation of waste screening facilities, reinforcement of policy and technical capabilities related to waste resource conversion
59	Proof of Concept of decarbonization	Indonesia	Japan	The PoC of decarbonization by Introducing Electric Vehicles (EVs) for Pickup and Deliveries of letters and parcels This project aims to conduct the trial introduction of Japanese EVs.
60	Public Transport Infrastructure Improvement	Viet Nam	Japan	This project aims to increasing traffic demand in Binh Duong Province and to improve connectivity with Ho Chi Minh City by

No	Activity	Proponent States	Partner States	Project Description
	Project in Binh Duong Province			constructing flyovers, median strips and other facilities on the arterial road.
61	Renewable Energy Cooperation for Cirata Solar Powerplant	Indonesia	United Arab Emirates	Masdar and PLN has cooperated to construct the largest floating PLTS in Southeast Asia and the second in the world, the 145 MW Cirata Floating PLTS project will start operating in September/October this year. Indonesia has a lot of potential for developing floating solar power plants in existing reservoirs and it will be a big step towards another big renewable energy projects.
62	Salt off-take for aluminum production and outbound investment by MIND ID in BCI Minerals.	Indonesia	Australia	The strategic collaboration plan between MIND ID and BCI Minerals in the Mardie Salt and Potash project in the Pilbara region.
63	Scaling Out Sustainable Solid Waste and Wastewater Management to Improve Public Health and Environment	Lao PDR	Republic of Korea	Establishment of green city plan and attraction of green investment and establishment of solid waste and wastewater management system and capacity building in 4 provinces.
64	Semarang-Demak Toll Road Development Project	Indonesia	People's Republic of China	The construction of toll road and sea dike construction from Semarang to Demak funded by PRC has begun in January 2023 to further develop the connectivity in Java.
65	Sihanoukville Port New Container Terminal Development, Expansion Project (Phase I)	Cambodia	Japan	The objective of the project is to improve the container cargo handling capacity by expanding new container terminal at Sihanoukville Port.
66	Solar off-grid infrastructure - CAPRED	Cambodia	Australia	The solar off-grid infrastructure development program leverages private sector investment to connect electricity to remote villages in Kratie Province, Cambodia.
67	Solar panel manufacturing investment	Indonesia	United States	Construction of a 2 GW Solar Panel facility planned for the year 2023 and additional 3 GW Solar Panel factory and 3 GW Solar Module factory in the year 2024.
68	StB Giga Lithium-Ion Battery Pack Manufacturing Plant, New Clark City	The Philippines	Australia	St. Baker Energy Innovation Fund is investing a major lithium battery manufacturing facility in The Philippines. Manufacturing plant will manufacture EV battery packs, Battery Energy Storage Systems (BESS) and EV fast charging stations, for export.
69	SUSI Asia Energy Transition Fund	ASEAN Member States	United Kingdom	SUSI has made four investments funding on behalf of SAETF Renewable Energy, Energy Storage and Energy Efficiency.
70	Sustainable Coastal and Marine Fisheries Project	Cambodia	France	This project will take place in four coastal provinces of Cambodia: Koh Kong, Sihanoukville, Kampot, and Kep. The credit agreement was signed in December 2022. Implementation will commence in 2023.

No	Activity	Proponent States	Partner States	Project Description
71	The Geothermal Power Generation Project in Indonesia using JFJCM	AMS	Japan	ADB support development of geothermal power generation plants in Dieng, Central Java, and Patuha, West Java, Indonesia.
72	The operational of 2 aircraft freighter aircraft	Singapore	Indonesia	Freighter daily flights with 2 leased BOEING 737-800BCF aircraft, capacity 23 tons, will be operating in Singapore starting August 2030.
73	The Patimban Access Toll Road Construction Project	Indonesia	Japan	This project aims to develop a toll access road between Patimban Port located in eastern Jakarta Metropolitan Area.
74	Three Priority Bridges Crossing Pasig-Marikina River and Manggahan Floodway Bridge Construction Project	The Philippines	People's Republic of China	Construction of three bridges crossing the Pasig-Marikina River and Manggahan Floodway, which aims to improve traffic flow in Metro Manila and is scheduled to complete in 2027
75	TPX Ville Verte Project	Viet Nam	France	The urban development, infrastructure, and climate change adaptation project in the city of Dong Ha, Quang Tri province, aims to enhance climate, social, and economic resilience. Loan agreement signing is scheduled for October 2023.
76	Turn-Key construction for 12 bridges on National Road 20 in Champasack and Saravan Provinces, Lao PDR.	Lao PDR	The Netherlands	This is a government funded infrastructure project with a 100% financial package from Invest International. The project concerns 12 bridges on National Road 20, the construction contract starts in March 2023 and is valid until March 2027 for 3 years construction followed by a 1-year Defects Liability period.
77	USAID Sustainable Energy for Indonesia's Advancing Resilience (SINAR) program with Pertamina	Indonesia	United States	The project is about project management support assistance and technical partnership for sustainable business and renewable energy development.
78	Viet Nam National Power Transmission Corp. (NPT) Energy Transmission Company Strengthening Project	Viet Nam	France	This project aims to strengthen Viet Nam's electric transmission network, enabling increased low-carbon production and energy transition. The signing is scheduled for October 2023.
79	Vietracmimex Solar Power Project	Viet Nam	People's Republic of China	CGIF supported HONG Phong 1 Energy's successful issuance 3-year PV project debentures in Viet Nam. The project is a subsidiary of VIET, a Vietnamese company with a total installed capacity of 325 MW of solar power plants.
80	Waste water and Solid Waste Treatment Capacity Building Project for City Environment Improvement	Lao PDR	Republic of Korea	Establishment of sustainable green city development plan for Vientiane and Pakse. The project will include establishment of wastewater in Pakse and solid waste in Vientiane treatment facilities.
81	West Sumatra Micro Hydropower	Indonesia	United Kingdom	PT Sarana Multi Infrastruktur (SMI) officially funded three Micro Hydro Power Plant

No	Activity	Proponent States	Partner States	Project Description
				(PLTMH) projects developed by PT Brantas Energi with a total capacity of 7 MegaWatt.
Total Projects				81 Projects
Total Value				USD 34.531.767.798

B. Subtheme II: Sustainable and Innovative Financing

No.	Activity	Proponent States	Partner States	Project Description
1	"SDG Indonesia One1 Platform" Project	Indonesia	France	Strengthening the financing reach of PT SMI that directly contributes to the SDGs and climate change adaptation, in order to drive sustainable and low-carbon growth in Indonesia.
2	First Real Estate Investment Trust Project	Singapore, Indonesia	People's Republic of China	CGIF backed the issuance of a 5-year social effect bond by Singapore-based First Real Estate Investment Trust, which focuses on investment holdings in healthcare and related properties such as hospitals, nursing homes, rehabilitation centres, and other healthcare initiatives.
3	Promoting energy efficiency investment market in the industrial sector and supporting the National Green Growth Action Plan (GGAP) of Viet Nam	Viet Nam	Republic of Korea	Preparation for Energy Efficiency Investment Projects (energy efficiency project pipeline), Support in enforcement of Energy Efficiency and Conservation Regulations & Green Growth investment.
4	Proposed Investment in PT Bank Tabungan Pensiunan Nasional Tbk (BTPN) for Debt Capital Market (DCM) BTPN Debt Project	Indonesia	United Kingdom, International Finance Corporation	IFC Investment in PT Bank BTPN Tbk, comprising a social bond and a green bond issuance, which is supported by the UK government.
Total Projects				4 Projects
Total Value				USD 736.360.127

Subtheme III: Inclusive Digital Transformation

No	Activity	Proponent States	Partner States	Project Description
1	Development of domestic underwater fibre optic cable systems	Indonesia	United States	This program will provide PT Super Sistem with the necessary analysis, design, and plans to implement an underwater optical cable system.
2	Establishment of geospatial data infrastructure and capacity building project	Lao PDR	Republic of Korea	The project is already ongoing and include map creation of core development area of Savannakhet province, build Capacity for

No	Activity	Proponent States	Partner States	Project Description
	for developing special economic zone in Savannakhet Province, Lao PDR			map making, and establish NSDI (National Spatial Data Infrastructure) of Lao PDR
3	Macquarie Asia-Pacific Infrastructure Fund 3 (MAIF 3), stake in Bersama Digital Infrastructure Asia	Indonesia	Australia	In May and August 2022, a consortium led by Macquarie Asset Management (MAM) via Macquarie Asia-Pacific Infrastructure Fund 3 (MAIF 3), acquired a significant minority stake in Bersama Digital Infrastructure Asia with focus on telecommunication towers, fibre and data centres.
4	Smart Aquaculture Development and Conservation of Marine Ecosystem in Guimaras Province, The Philippines	The Philippines	Republic of Korea	Construction and operation of a Smart Hatchery Facility to improve food resilient in the area
5	The Philippines Digital Connectivity/Copernicus Project	The Philippines	European Union	This initiative aims to develop the Copernicus data centre hub (national mirror site) utilizing Copernicus satellite data to enhance disaster risk management and climate change analysis. This initiative also intends to expand to ASEAN countries to ensure reliable and secure connectivity through existing or new submarine cables for accessing Copernicus data.
6	The production of the SATRIA 1 satellite	Indonesia	France	The project is on the production of satellite (SATRIA 1), the satellite has been launched on June 19th, 2023, using SpaceX's Falcon 9 rocket
7	The project for the establishment of the Viet Nam-Korea Institute of Science and Technology (V-KIST)	Viet Nam	Republic of Korea	Establishment of the institution, construction of research and administrative buildings, establishment of Integrated information system. Ex-post support for additional equipment is under consideration for the year 2023
8	the Sihanoukville-Hong Kong Submarine Cable Project	Cambodia	People's Republic of China	An operational and internationally compliant submarine cables system, cable landing station in Cambodia, cable landing facility in Hong Kong of China, line termination and power feed equipment, network management system, and data centre including backbone cable from Phnom Penh to Sihanoukville for its Sihanoukville- Hong Kong Submarine Cable.
Total Projects				8 Projects
Total Value				USD 2.936.817.320
